Preface

System Requirements:

- ❑ Microsoft Access
- ❑ The CSU Business Department Student Advisement Database must be loaded on the computer

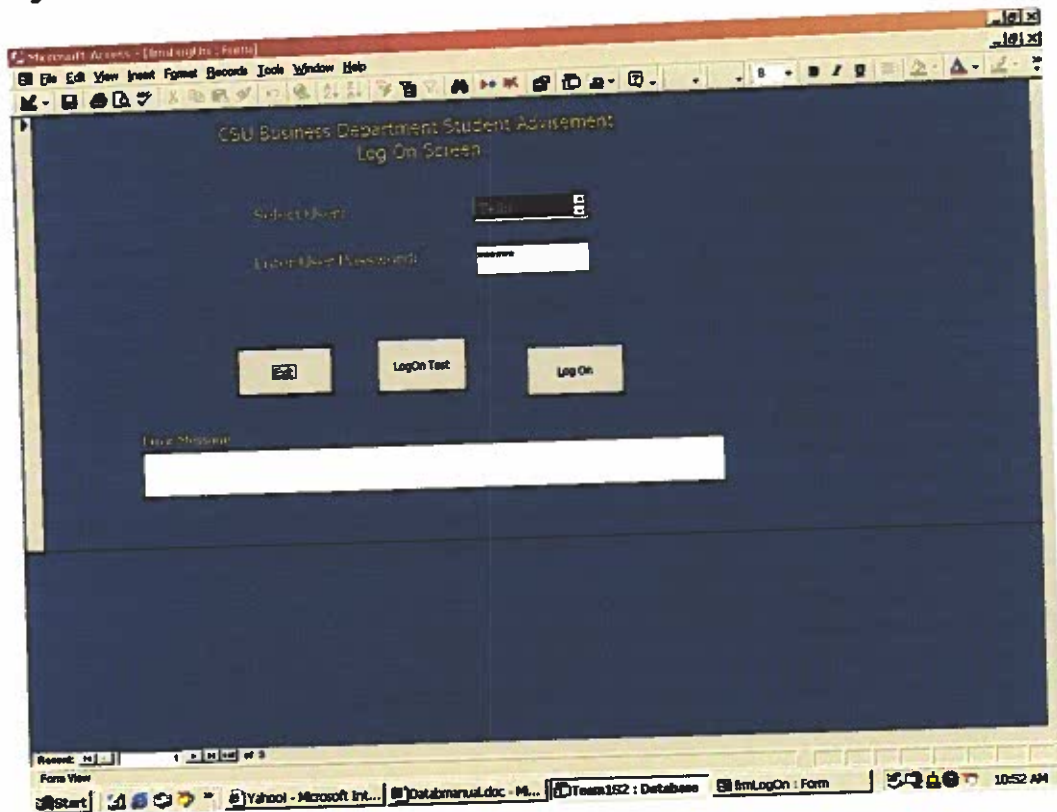

User Requirements:

- ❑ A user ID and password must be obtained from a Business Student Advisor
- ❑ A valid Student ID number
- ❑ Without proper ID numbers and passwords users will not be able to log on

User Interface Documentation

System Log On Procedure:

CSU Business Department Student Advisement Log On Screen:

- ❑ Select from the List Box the Desired User
- ❑ Enter the User's Password in the "Enter User Password"
- ❑ Press the 'Log On' button to continue to the main menu or
- ❑ Press 'Exit' to exit the application

- ❑ If any errors occur an error message will appear in that section of the screen

Student ID Selection Screen:

Student ID Selection:

- ❑ Enter student ID in the "Enter Student ID" text box or
- ❑ Press the 'Press to Continue' button to continue to the Main Menu Screen
- ❑ If any errors occur during this process, an error message will be shown in the box below the 'Press to Continue' button

Main Menu Screen:

Microsoft Access - [frmMainMenu: Form]

Charleston Southern University
Academic Programs

Project Overall Purpose:

The system's purpose is to provide a faculty advisor the ability to properly lay out the courses to be used by an undergraduate business student at CSU.

Project Documentation:

- ❑ The documentation will be submitted in a three-ring loose-leaf project notebook.
- ❑ Separate each milestone using tab dividers. All previous milestones must be contained in the notebook. All milestone sections must be submitted with professional quality.
- ❑ Each milestone must be defined. Each iteration of your work towards those milestones must be turned in.

Project Goals:

- ❑ All data must be contained within a database that runs on a personal computer.
- ❑ The architecture must be at least a two-tier system.
- ❑ Source code to any programming code written must be accessible by the instructor.
- ❑ A user manual of sufficient length is to be written to guide the average user.
- ❑ Predetermined milestones:
 - ◆ Complete description of the functionality of the system. Due the fourth week of the semester.
 - ◆ Complete entity-relationship diagram of the system. Due the seventh week.
 - ◆ Complete physical database design plan. Due the eleventh week.
 - ◆ Beta model of the project. Due fourteenth week.
 - ◆ Completed finished project. Due the last week before final examinations. All documentation, source code and working models due.
 - ◆ Reading Day: Defense of Project before advisers.

Milestone #1 – Functionality of the System:

General Functionality:

The system is to provide a faculty advisor to properly lay out the courses to be used by an undergraduate business student at CSU.

Application Process Description:

The system will contain several components. The first component is a security module. All faculty members that will have privileges to this system must have a security record created within the application security table.

The next module provides a foundation for the system. Once the faculty as entered the application, they will enter the "student ID" and the application will locate the student and present a display mode of the student's information. If the student is not present within the system, the faculty advisor will be presented with a new student information display.

That sets up the next module. The insertion or addition of new students into the Business Degree Tracking system. Personal information along with the type of Business degree and emphases will be entered and a course mapping or tracking will be created for that student. Once the map is created, the advisor can amend that map to allow for courses that were transferred from other institutions and have a matching corresponding course at CSU.

For students that already exist in the Business Degree system, the advisor will be given the capabilities to modify the course mapping or tracking schedule for that student. Changes in emphases and the type of Business degree will change the course mapping/tracking for that student. Courses that were required for one-degree type may not be required at a core level thus course map must be adjusted to reflect those changes. The system will also track the date the degree was undertaken and the requirements for graduation based on that catalog. If the student is a returning student and has been out for a period of time that is defined within the CSU handbook, the faculty advisor will have to modify the course map to reflect the new degree requirements.

The display module will reflect the following. The courses completed, the course area (core areas) that this course was applied, the statuses for each course completed (failed or passed and the circumstances for which the course was completed under – withdrawn but failing, course is being taken during the current semester, or etc.). It will also inform the advisor if the student has not met the requirements for graduation as the pre-determined date. The warning indicator will use the semester breakdown defined in the CSU catalog. Freshman year (both semester) will be given a numeric weight based on the number of credit hours defined for a freshman and the number of completed credit hours that were completed successful. For example, by the time a freshman has completed their first year at CSU, they should have completed, say, 24 credit hours. If the student's completed credit hours is 16, the display indicator will advise the faculty advisor that this student has not met the required credit hours for graduation at a pre-determined year. This index will begin with credit hours of 18 credit hours. Anything lower will result in a warning. A sophomore will have an index and so on until the Senior level. However, if the student is part time, then the mapping will be adjust to reflect part time status. Meaning that the student is projected to complete their degree program in twice the time of a full time student.

Application Functionality:

- a) **Insert new student into Business Administration Advisor/ Student tracking system.**
- b) **Insert new student into Student Information system for Business Department.**
- c) **Create and Insert Business Degree course map/path required for new students.**
- d) **Manage Transfer students and allow for course acceptance.**
- e) **Modify Business Degree course map/path required.**
- f) **Modify degree emphases and provide application revision to course map/path required.**
- g) **Display student information. Display will provide advisor with:**
 - 1) **Courses completed and completion status of those courses;**
 - 2) **Tracking information will show students progress through the Business degree program. (Each semester will be considered a milestone, at each of these milestones, the number of hours completed by the student should fall within a set range for that particular semester. This allows the advisor to monitor each of their advisees and their progress through the Business program. Failure to fall within these set ranges will notify the advisor that additional attention might be warranted.)**

Milestone #1 Notes:

- I. From CSU Catalog: There are 3 undergraduate business programs.
 - Catalog Requirement Data for Each Type of Business Degree Program at CSU:
 - Business Administration Major (BS Degree)
 - A. Liberal Arts Core – 45 hours
(Must include: Economics 211, Mathematics 219, COINS 209)
 - B. Major Core Studies – 35 hours
(Must include: Business 211, 212, 222, 223, 305, 313, 317, 345, 485, Economics 212, 224)
 - C. Emphases – 12 hours (Choose only one)
 - Accounting:
(Business 321, 322 and two from the following: 409, 417, 418, 425, 428, 455, 470, 481)
 - Finance:
(Business 446 and any 3 from the following: Business 315, 412, 417, 418, 451, 455, 481, 491, Economics 311, 414, 426)
 - Information Systems:
(All 8 classes are required. COINS 217, 249, 335, 419, 495, 497, 498, 499. Note as part of the Liberal Arts Core, COINS 217 is required.)
 - Management:
(Any 4 from the following: Business 318, 337, 341, 404, 409, 411, 451, 452, 455, 461, 474, 475, 481, 491, Economics 412, 452)
 - Marketing:
(4 classes of which, select at least 3 from the following: Business 332, 352, 404, 421, 431, 452. You may also select 1 from the following: Business 341, 475, 481, 491, 455, Economics 314)
 - Environment Management Major (BS Degree)

Senior Project Design, Construction and Implementation
Jeff Schimizzze

- A. Liberal Arts Core – 45 hours
(Must include Economics 211 and Mathematics 219)
- B. Major Core Studies – 65 hours
(Economics 212, 224, 314, 452 and Business 345)
- C. Economic Electives - 18 hours
(Select any 6 from the following: Economics 311, 315, 326, 330, 331, 412, 414, 421, 422, 451, 491)

NOTE: Students with a major in Business Administration and a minor in Economics may not use the same upper courses (300/400) to satisfy requirements in both areas.

□ Business Administration Major (BA Degree)

- A. Liberal Arts Core – 44 hours
(Must include Economics 211, Mathematics 121 and COINS 209)
- B. Major Core Studies – 33 hours
(Business 211, 212, 222, 223, 305, 313, 317, 485, Economics 212, 224. Select one from the following: Sociology 201, Psychology 200, English 450 or an approved foreign language)
- C. Emphases – 15 hours
 - Management:
(Select 5 from the following: Business 315, 318, 332, 341, 404, 409, 411, 412, 451, 452, 455, 461, 474, 475, 481, 490 or Economics 412, 452. At least 1 of the above must be Business 404 or 411.)
 - Marketing:
(Select 5 from the following: Business 315, 332, 341, 352, 404, 411, 412, 431, 452, 475, 481, 490 or Economics 412, 451. At least 1 of the above must be Business 404 or 411.)

II. Customer Questioner:

- ◆ What type of information will be displayed by the user interface as a response from the initial process?
- ◆ What will the user enter as data to begin the process? (parameters ie. ssn, student name)
- ◆ Are there any special conditions we should be aware of?
- ◆ Please define in detail your vision for what the system will perform for you and all the necessary output you require performing your task.
- ◆ Are there any particular steps necessary to derive data not easily available? 6) Are there any specialized output, ie. reports necessary from this system?

III. Data Repository:

- ♦ **Contains the information/outline concerning the curriculum path select between the advisor and student.**
 - a) **Student ID.**
 - b) **Business Degree Program. (BS, BA)**
 - c) **Business Degree Emphases. (Marketing – Based on the Type of Business Degree Program)**
- ♦ **Student Information**
 - a) **Student ID**
 - b) **Student's SSN.**
 - c) **First Name**
 - d) **Last Name**
 - e) **Middle Initials**
 - f) **Phone Number**
 - g) **Email Address**
 - h) **Local Address**
 - i) **Local Address 2**
 - j) **City**
 - k) **State**
 - l) **Zip Code**
- ♦ **Course Tables (There are multiple tables supporting the courses)**
 - a) **Department ID**
 - b) **Course Number**
 - c) **Course Description**
 - d) **Liberal Arts Qualification**
 - e) **Major Core Qualification**
 - f) **Elective Qualification**
 - g) **Prerequisites Required**
 - h) **Prerequisite Courses**
- ♦ **Student Curriculum**
 - a) **Student ID**
 - b) **Degree Program**
 - c) **Degree Emphases**
 - d) **Program Start Date**
 - e) **Hours Transferred Total**
 - f) **Hours Transferred Towards Degree**
 - g) **Number of hours Needed to Graduate**
 - h) **Number of hours Completed**
 - i) **Overall GPA**
- ♦ **Student Course History**
 - a) **Student Id.**
 - b) **Courses Undertaken by the Student.**
 - c) **Section**
 - d) **Hours**
 - e) **Location**
 - f) **Bldg**
 - g) **Room**

- h) Course Status Code Indicator. (Refer to Course Status Code Table within this Document)**
- i) Instructor**
- j) Transfer Courses Accepted by Institution.**
- k) Transfer Courses Accepted by Institution but can not be used Towards Satisfying Core Requirements.**
- l) YearDate**
- m) Semester**
- n) Term**
- o) CreditAwarded**
- p) Days - Which day of the week the class is held**
- q) Course Title**
- r) Begin Date**
- s) Begin Time**
- t) End Date**
- u) End Time**
- ♦ **Security**
 - a) User ID**
 - b) Password**
 - c) User Type**

IV. Software Requirements:

- ♦ **Access 2002 - As the database engine**
- ♦ **VBA**

V. Business Logic Requirements:

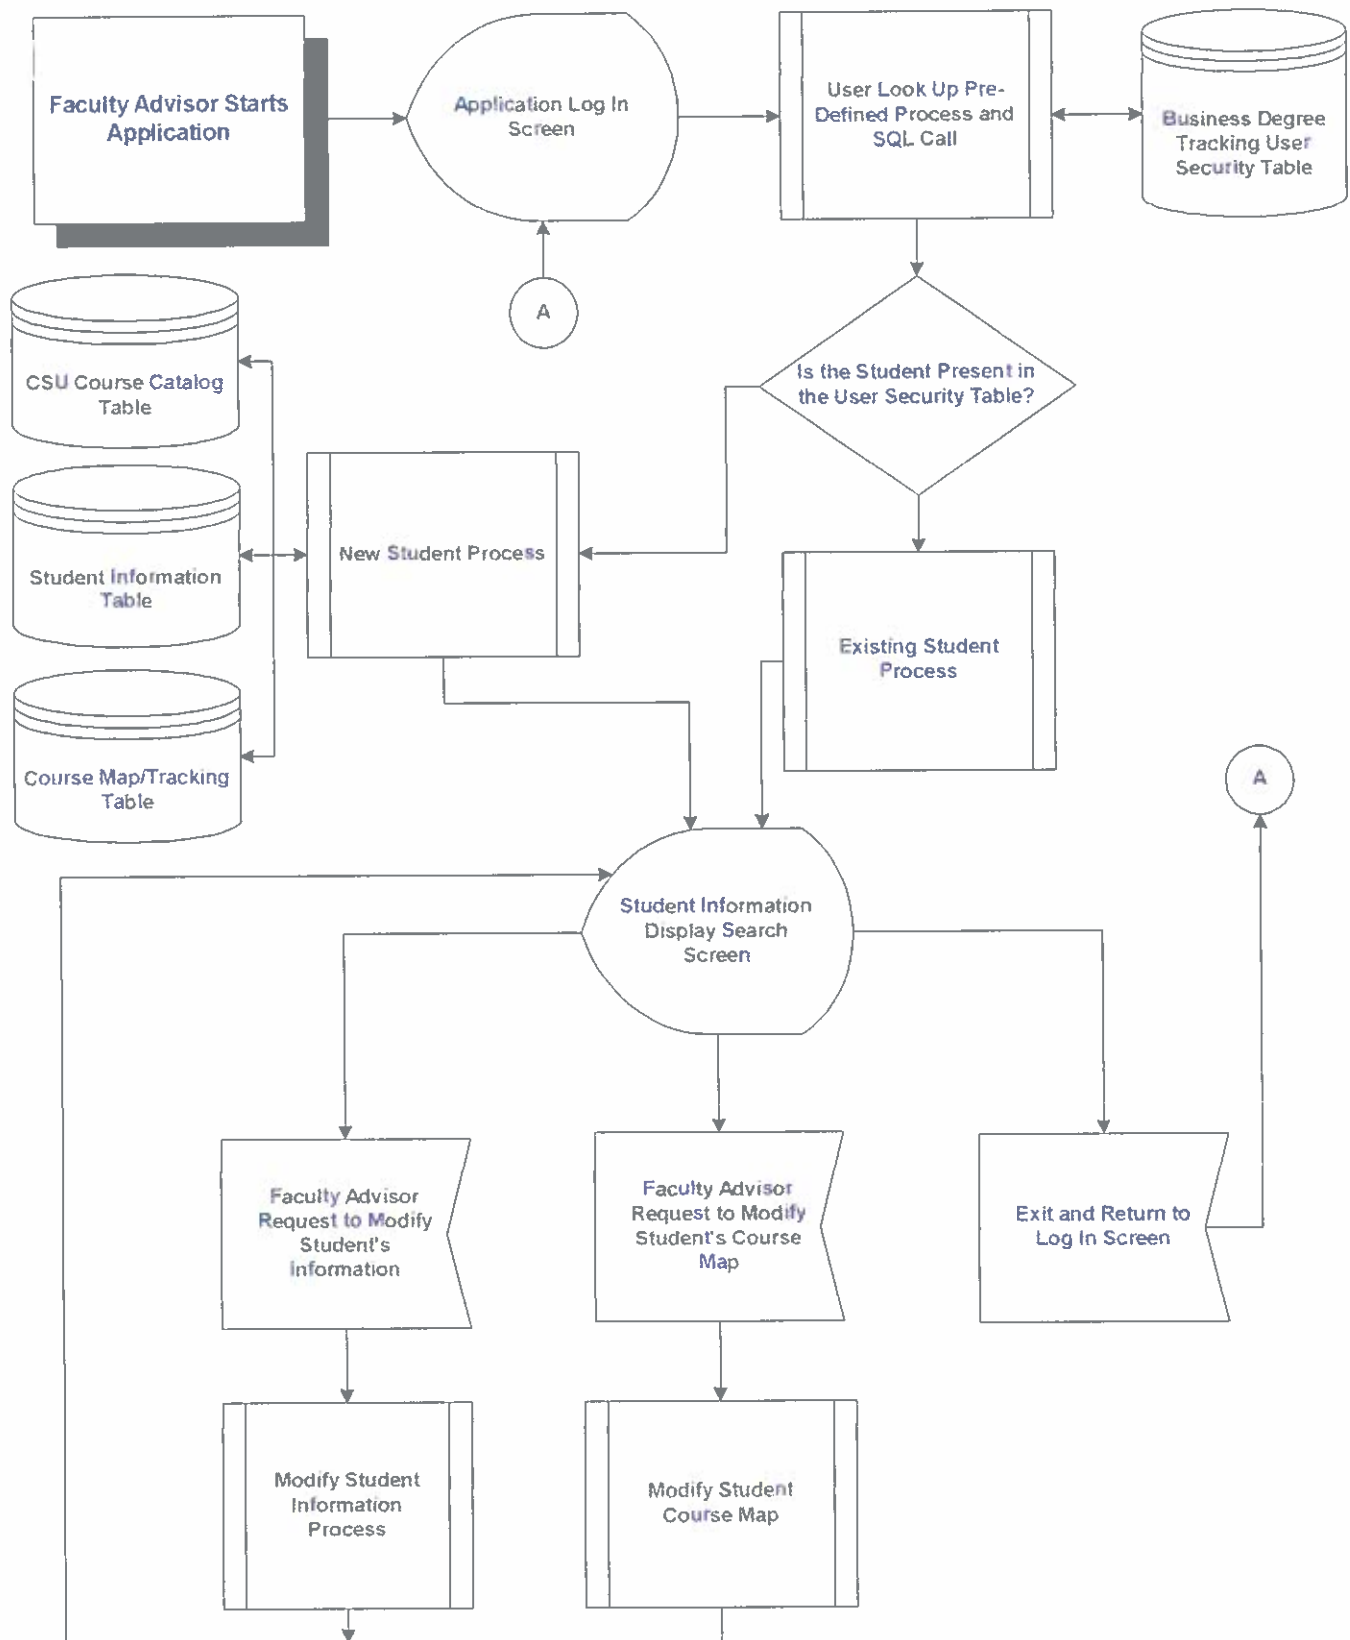

- ◆ User Log In process
- ◆ User application screen – 1st screen
 - a) The advisor enters the student's Identification number.
 - b) If the student is a current student or a returning student, the application will present a application main menu for the system.
 - c) If the student does not have a record present, the advisor will enter the Student ID and select the type of 'New' student. The new student will either be a new student or a transfer student. Once the student ID and the appropriate checkbox is selected, once the user presses the command button to present the "Add New or Transfer" student.
- ◆ Student Information application screen – Is screen will request the student's name social security number, mailing and residence address, contact phone number and the major they are seeking.
- ◆ New CSU Student or Transfer student interacts with the tblStudent_Information table. This is where the information is placed into this table.
- ◆ The Student History Screens (Display and Maintenance) Screens – These screens are used to insert new registration classes and also display classes already undertaken. For a new student, there will be no records until the first registration. All classes attempted is entered at registration time and tracked from there on.
- ◆ Application user data can be entered and maintained using the 'Application Security Menu'. This menu selection, from the main menu, brings a Security menu which allows the application manager to add or modify new or current users.
- ◆ Maintain Student Degree Program menu option allows the department to modify the student's degree record. This record contains which degree program and emphases they are pursuing and when they are expected to graduate.
- ◆ The Student Display Information screen will have student's name but also the courses completed and that status of that course. (Status codes will be used to indicate if the class was completed with a passing grade; completed with a failing grade or etc. Please refer to "Course Status Identification Indicators" section for complete description.)
- ◆ Student registration information is inputted via the Student Registration screen. Modification to an existing registration record is performed via the Modify Student Registration menu selection. To display registration data, use the Student History Display menu selection.
- ◆ Business Degree Requirements are provided by printed media. The user selects the "Degree Courses Requirement" menu option. This will migrate the user to a form which will allow them to select which time of documents required for that particular student.
- ◆ Modification screen will afford the advisor the ability to modify the following areas.
 - a) This screen will allow the advisor to modify the student's major declaration and emphases.
 - b) Modify the course map for that student's major.
- ◆ Business Rules:
 - a) If a student is majoring in Business Administration and a working towards a minor in Economics, they may not use the same upper level courses (300/400) to satisfy the requirements for both areas.
 - b) There are different course paths for Business Administration depending on the type of degree sought; BS or BA.

Senior Project Design, Construction and Implementation
Jeff Schimizzze

- c) **BS source path in Business Administration, COINS 217 is a Liberal Arts Core requirement.**
- d) **Transfer courses from another accredited institution will be reviewed and if a similar course is offered at CSU, then the class will be accepted as a transfer. If a similar course is not offered at CSU, then the transferred course will be accepted as an Elective course in a discipline other than the discipline declared as the student's major.**
- ♦ **Course Status Identification Indicators:**
 - ❑ **CRNT - Enrolled in Current Semester**
 - ❑ **TRNF - The Course was Accepted as a Transfer Course**
 - ❑ **CMPP - Course was Completed with a Passing Grade**
 - ❑ **CMPP - Course was Completed with a Failing Grade**
 - ❑ **WDLP - Withdrawn from the Class with a Passing Grade**
 - ❑ **WDLF - Withdrawn from the Class with a Failing Grade**
 - ❑ **ICMP - Uncompleted Course**
 - ❑ **CTDP - Course Tested Out; Credit Awarded for this Course**

Database Column Data Type Descriptions: 5

Table Content and Relationship View:..... 6

Student Curriculum:

Table Name: Student_Curriculum

Table Description: This table contains information concerning courses taken, transferred in and the course path laid out for this student's degree pursuit.

Table Content:

- a) **Primary_Key** – Predefined AutoNumber result.
- b) *Student_ID* – Student identification (Foreign Key)
- c) *Degree_Program* – The degree being sought. (ie. BS or BA)
- d) *Degree_Emphase* – The area of emphases sought under the degree program
- e) *Program_Start_Date* – The date the student started towards their selected degree path.
- f) *Hours_transferred_Total* – The number of credit hours accepted for transfer by CSU by another accredited institution.
- g) *Hours_Transferred_Towards_Degree* – The number of credit hours allowed for use towards a graduation.
- h) *Number_Of_Hours_Needed_Graduate* – The number of total credit hours needed to complete the selected degree program path.
- i) *Number_Of_Hours_Completed* – The number of hours completed towards graduation.

Student History:

Table Name: Student_History

Table Description: This table lists the courses taken towards completed the selected degree.

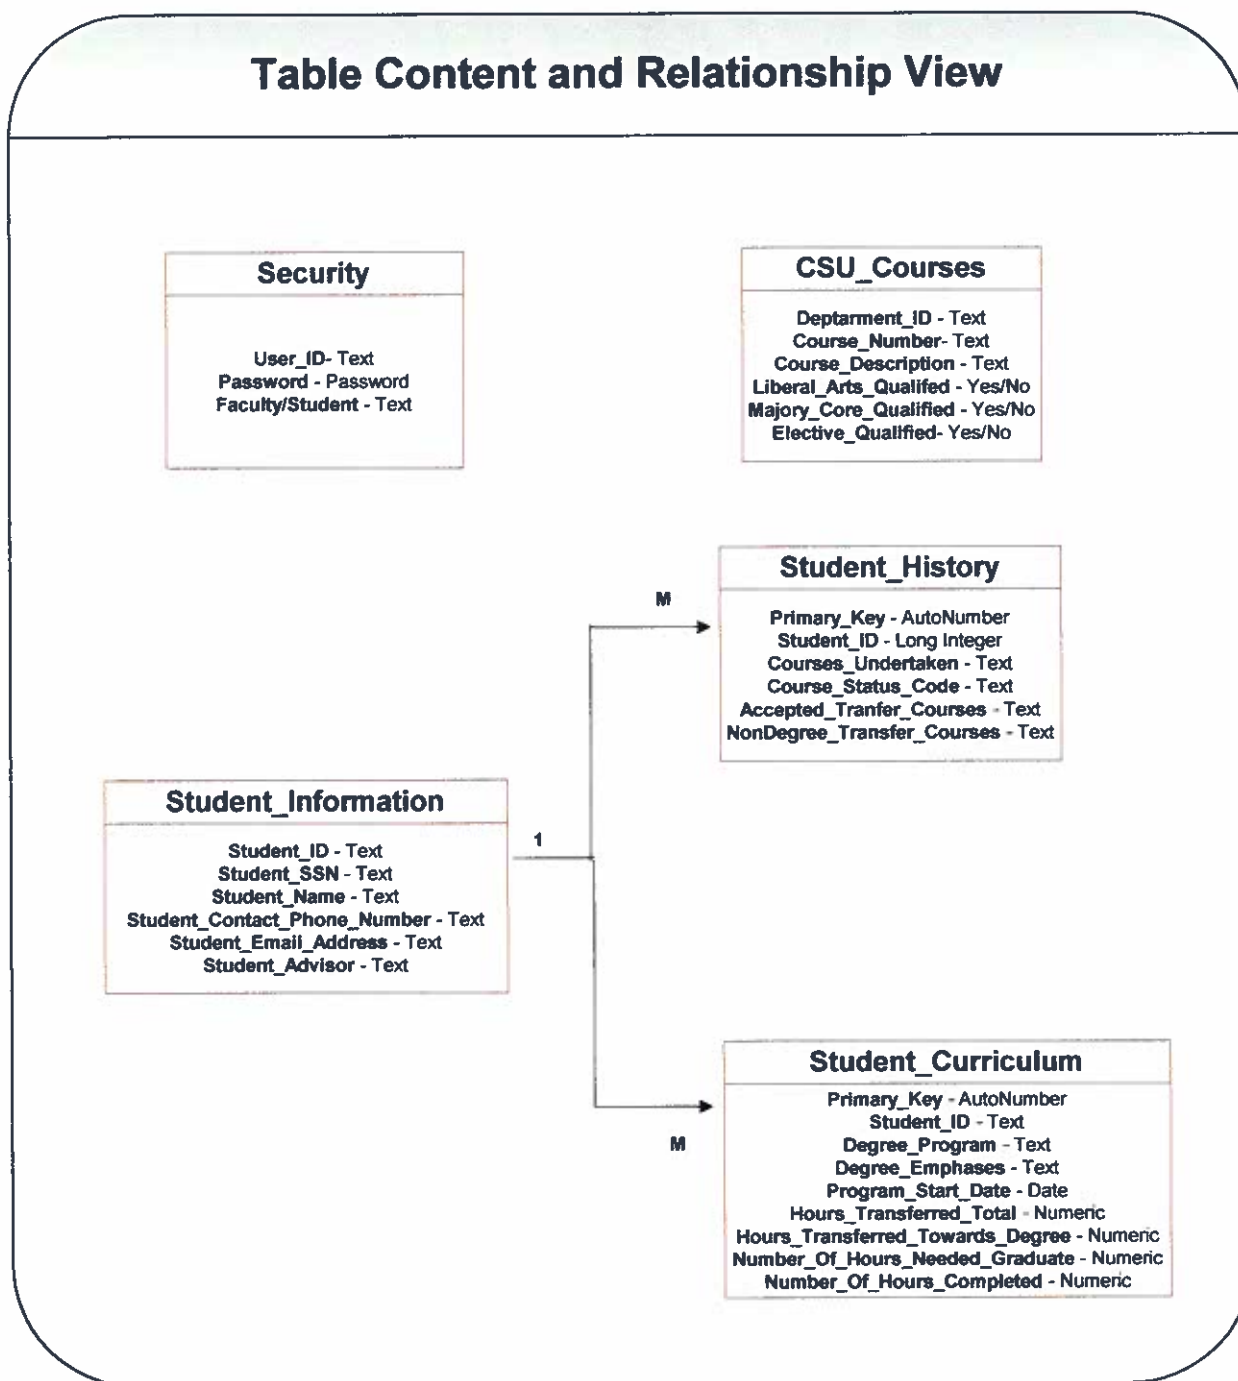

Table Content:

- a) **Primary_Key** – Predefined AutoNumber result.
- b) *Student_ID* – Student ID (Foreign Key)
- c) *Course_Undertaken* – Courses that were taken by the student towards the selected degree path.
- d) *Course_Status_Code* – This field or column is in direct association with *Course_Undertaken*. Each course undertaken must have a status code associated with it to explain the outcome of the class.
- e) *Accepted_Transfer_Courses* – All the courses transferred in from an accredited institution accepted to meet the selected degree program.
- f) *NonDegree_Transfer_Courses* – Course transferred in from an accredited institution but cannot be used towards the Liberal Arts core or the degree Major core.

Table Profiles:

Column Name	Data Type	Data Length	Number of Decimal Position	Defaults Values	Key Field(K) or Foreign Key (F)
User_ID	Text	10	n/a	Not Null	K
Password	Text	10	n/a	Not Null	
Faculty_Student	Text	1	n/a	F	
Department_ID	Text	30	n/a		K
Course_Number	Text	10	n/a		K
Course_Description	Text	255	n/a		
Liberal_Art_Qualified	Yes/No	1	n/a	N	
Major_Coure_Qualified	Yes/No	1	n/a	N	
Elective_Qualified	Yes/No	1	n/a	N	
Student_ID	AutoNumber		n/a	Not Null	K
Student_SSN	Text	11	n/a		
Student_Name	Text	50	n/a		
Student_Contact_Phone_Number	Text	20	n/a		
Student_Email_Address	Text	50	n/a		
Student_Advisor	Text	50	n/a		
Primary Key Field	AutoNumber			Not Null	K
Student_ID	Integer Long	Max	n/a	Not Null	F
Degree_Program	Text	10	n/a		
Degree_Emphase	Text	30	n/a		
Program_Start_Date	Text	10	n/a		
Hours_transferred_Total	Integer	max	0	0	
Hours_Transferred_Towards_Degree	Integer	max	0	0	
Number_Of_Hours_Needed_Graduate	Integer	max	0	0	
Number_Of_Hours_Completed	Integer	max	0	0	
Primary Key Field	AutoNumber			Not Null	K
Student_ID	Integer Long	max	n/a	Not Null	F
Course_Undertaken	Text	50	n/a		
Course_Status_Code	Text	10	n/a		
Accepted_Tranfer_Courses	Text	50	n/a		
NonDegree_Transfer_Courses	Text	50	n/a		

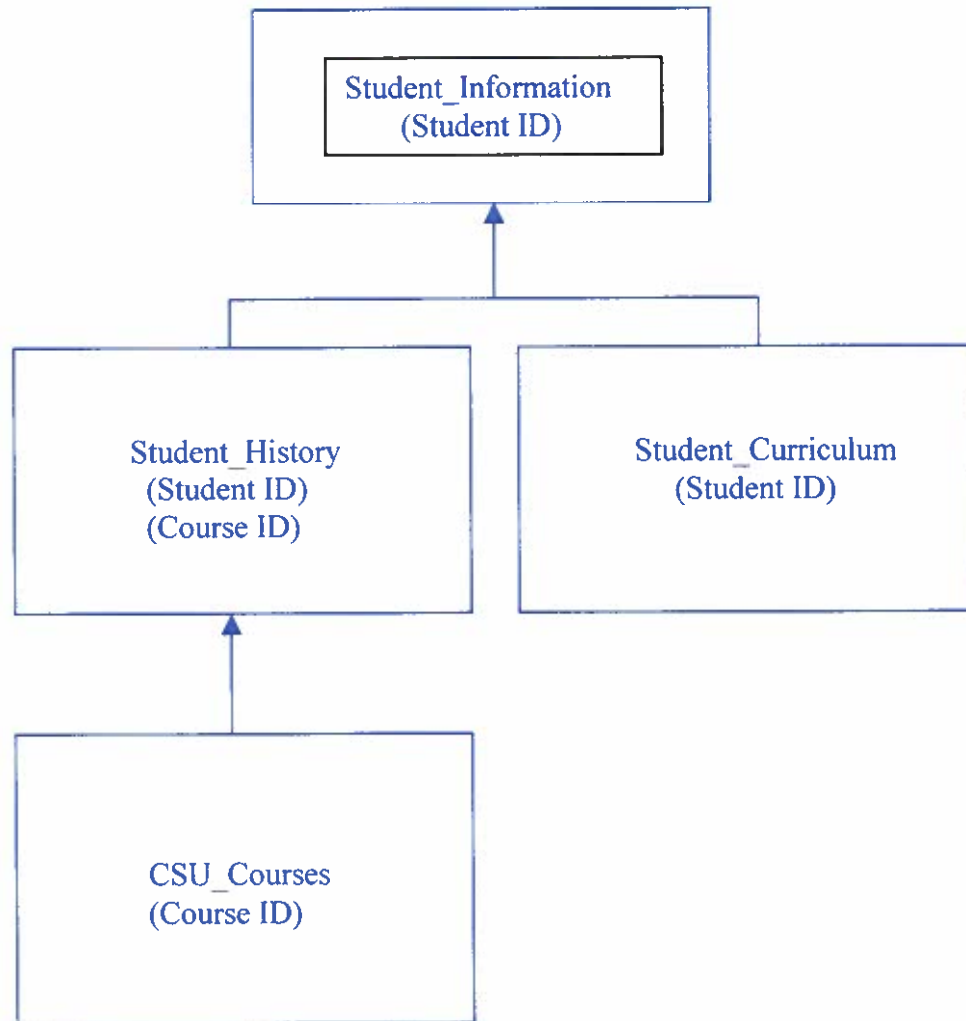

Application Profiles:

- Note: 1. All frequencies are calculated based on 5 Business Department Advisors (Users)
2. During Registration Advisors accommodate 14 appointments each per day
3. Off Registration frequencies are variable, but are not expected to exceed registration usage. Thus registration usage equals maximum expected usage.
4. 30% of Students are new to the University/Department; all others are current students

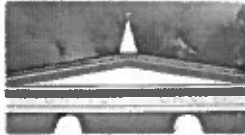

<i>Application Name</i>	<i>Tables</i>	<i>Operation</i>	<i>Frequency (Assumed)</i>
Student Information Form	Student_Information Student_History	Insert	25 inputs per day during registration
Student Information Sub-Form	Student_Curriculum	Insert	25 inputs per day during registration
Student Information Form	Student_Information Student_History	Retrieval	45 inputs per day during registration
Student Information Sub-Form	Student_Curriculum	Retrieval	45 inputs per day during registration
Student Curriculum Form	Student_Information	Insert / Delete	70 inputs per day during registration
Student Curriculum Sub-Form	Student_Curriculum	Insert / Delete	70 inputs per day during registration
Student Information Report	Student_Information Student_History Student_Curriculum CSU_Courses	Retrieval / Output	70 inputs per day during registration

File Structures:

Due to the use of auto-numbers as the primary key in the Student_Curriculum table and Student_History Table these tables will be stored in a *sequential file*. Due to convenience of sequential searching and in an effort to avoid collisions among the Student_Information Table we have opted to store this table in a *sequential file* format rather than the Hash File.

Student Adviceement Database

Charleston Southern University

Jeff Schimizza

Overview

- Background Information
- Design Process
- Construction
- Demonstration
- Future Plans

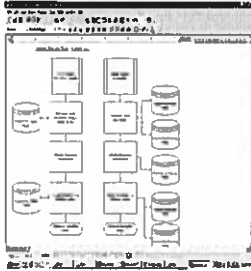

Background Information

- Personal Information
 - Business Major w/emphasis in Information Systems
 - Last Semester Senior
 - COINS Courses Taken: QBasic, COBOL, C++ Programming, C++ Data Structures, Networks and the Internet, Database Management, Systems Analysis

Background Information

- Purpose
 - To provide students and faculty with an easy to use course guidebook
 - To provide advisors and registrars with accurate and up-to-date student information
- Customers
 - CSU Business Department faculty and students
 - Registrar's Office

Construction

- Original Idea different than final product
- Many lessons learned
- Possible link to schools current enrollment system

User's Manual

- Step by Step Process
- User Friendly
- Quick Reference

Demonstration

- Login
 - User Name
 - Password
 - Distinguishes Between Faculty and Student
 - Error Message if Incorrect Password or User Id is given

Demonstration

- Main Menu Options
 - Display Student Information
 - Degree Course Requirements
 - Update Student Information
 - New Student Enrollment
 - New Transfer Student Enrollment

Demonstration

- Degree Options Form – Accessed Via Main Form
- Accesses Requirements/Reports for:
 - Liberal Arts Core
 - BS in Business Administration
 - BA in Business Administration
 - BS in Environmental Business

Demonstration

- Student Updates/Information forms:
Accessed via the Main Form
 - Basic Student Information
 - Faculty Advisor

Future Personal Plans

- Working as Communications Officer in the Air Force
- Stationed at Shaw AFB, Sumter SC

Review

- Background Information
- Design Process
- Construction
- Demonstration
- Future Plans
