# College4Less Executive Summary

## Background of College4Less

College4Less is an online store designed for college students to purchase laptop computers. Our project ties together the computer science and business aspects of the Bachelor of Arts program. The required business courses include Accounting, Business Finance, Management, Marketing, etc. All of those courses played a huge role in the planning of our company.

## Brief History of the Online Shopping

Online shopping has become extremely popular within the last couple of years. Shopping malls depleted and many other businesses have been wiped out. Online shopping is a form of electronic commerce, providing customers with more flexibility and availability of products. On August 27, 1979, Michael Aldrich invented online shopping using videotex technology. He designed, manufactured, sold, installed, maintained, and supported online shopping systems. Aldrich was a rediffusion computers employee. From that day, the foundation for e-commerce and online shopping was laid and the internet expanded even more. On January 10, 1984, Gateshead SIS/Tesco is the first Business to Customer online shopping. Mrs. Snowball, 72, was the first online home shopper. The United States is home of the largest online retail companies, eBay and Amazon.com. On July 5, 1995, Jeff Bezos launches Amazon.com. Months later September 3, 1995 Pierre Omidyar launched eBay. Since the launch of those companies, companies have created stores and applications for customers. In December 1998, PayPal launches. PayPal is an online payment company and an eBay company. The service has expanded and customers can now make payments by mobile device or in stores. Online shopping as made a major impact on the survival of the internet and businesses as well.

## Implementation of College4Less

When we started our project, we were using HTML and Cascading Style Sheets. When we started implementing user logins, we had to change the actual webpage files from htm to aspx format. That type of page created more flexibility for our pages and implemented the user logins. Along with those other languages, we began using ASP.NET and C# as well.

During the course of this project, we incorporated two other applications, Google Drive and Trello. These applications have made it easier to share files and keep up with project progress.

Google Drive is an application that allows users to create new documents, work on old documents with collaborators, share files, etc. The application was used to store our project files and when changes were made, they would re-sync on each account and keep an activity log for each file. This application is portable, allowing you to work from anywhere. It can be downloaded on your PC, Mac, Android, or iPhone/iPad devices.

“Trello is a collaboration tool that organizes your projects into boards. In one glance, Trello tells you what's being worked on, who is working on what, and where something is in a process.” This application supports Google Chrome, Safari, Firefox, and Internet Explorer browsers. Trello also is available on the iPhone, iPad, Android, and Windows 8 Platforms.

### Challenges Along the Way & Proposed Solutions

For our online store, we used PayPal to process transactions and manage our inventory. PayPal allows us to create buttons to view the cart and add a cart buttons for each item. We ran into issues where if the button were moved then it would do nothing when clicked. The code was actually being separated all throughout the code for that file. So this required a tedious amount of work because if the button was moved on each page, then all have to be fixed. When we started adding the add to cart buttons, a customer was able to choose how many they want on our page and then add to cart on PayPal. Problem was the quantity on our page was not linking to the PayPal cart; this posed an issue because we create the button, PayPal creates the code for that to ensure its going to the correct item and company cart. We had to remove this feature because it was not functioning properly when redirected. Customers do still have that feature on the cart to change their quantity.

ASP.NET was something that we touched on in networking courses, but the capabilities we have learned benefited our project heavily. User Logins was one of the components of our project that we learned a lot using ASP.NET also. Originally, all of our pages were htm pages and when we learned about implantation of the logins we had to change each file type to aspx file types because htm was not properly linking. We had also thought that some pages were lost because we could not locate them in the Visual Studio Project itself. The file types made a huge deal because we did not have to start completely over. We just were able to using html features and login features, such as hyperlinks, login windows, etc. We had no idea where to start. Multiple tries users' login information would not login even though passwords were correct. We had accounts having to recreated because a user' would not be able to access an original one. User Logins and ASP.Net meant a lot to our project because we gained a major feature overall.

The appearance of a Webpage is vital. When adding buttons and such, that code would get out of place based on where things were. We would add a button, and the text would get completely out of place and would unformat other parts. This would happen too often, and was a tedious process. Style boxes on the page would be empty and take up space but if deleted would affect the layout all over again. Changing sizes of boxes helped with this and constantly testing. Besides text being unformatted, Images would do the same thing. Graphics would be something that we did not put as much time into it that we should have and could have. We have no knowledge of graphic design, so this created a problem. Even checking out books from the library did not make situations any better.

Throughout all of these challenges, we both have taken something from it individually. I have learned about other services the make projects run well and were about to implement then.

### Project Summary

Our experience was beyond educational. From research or reading books, every action made was well spent. Our major concern about this project was whether it would help us apply what we have learned in a classroom and learn beyond that. In networking courses, we touched the surface about asp.net, htm, and cascading style sheets, hyperlinks, and place text on the screen, etc. Being able to link multiple pages and implement user logins were things that we had to learn more about and implement it as well. We ran into a number of issues using PayPal and that is what pushed us to find ways to solve the issue and prevent it from repeating.

We also had to incorporate online applications that would make our projects flow freely. Google Drive and Trello allowed communication and shared files to be more effective. Prior to learning about those, we would have to email back and forth. That created an inconvenience for progress because we may have a file the other does not.

The computer and information sciences curriculum including a number of required business courses that applied to our project. Since we created a company, we needed a Business Plan, which would outline College4Less as a company and not just a website. Through all of this, we have applied COINS courses and Business courses to expand.

### Future Possibilities

Compared to other websites, College4Less is missing a great deal of features. We would like to expand our inventory to computer accessories to provide flexibility. The ability to search for an item is important as well if a user does not have time to scroll through our page. We would also like to expand features such as a wish list, order history, etc for the user accounts. The wish list feature would allow customers to keep track of an item they may want, but cannot purchase now, or would be able to share the link with someone. The order history feature would track a history of everything they have purchased. These features would enhance the user experience.

## Challenges Along The Way

[illegible]

Baseline

[illegible]

## Spring 2013 Timeline

- Enhance Item Page and Homepage Graphics
- Reduce Inventory to laptops Only
  - 24 Laptops
- User Logins and Passwords
  - Learning ASP.NET Capabilities and Features
  - Making sure logins pass validation process
  - Linking accounts
- Overall Testing in preparation for defense
- Complete Defense Documentation
- Final touches

Future Possibilities

- *Phylogenetic relationships*
- *Phylogenetic relationships*

- V. Financial Plan
  - 1. Product Pricing
  - 2. Funding Source(s)
- VI. Appendix A: Resume(s)

## I. Executive Summary

Overview of the business explaining the fundamentals.

### 1. Business Owner(s) & Product/Service

- i. Who are you and what qualifies you to operate this business?  
College4Less is an online store ran by college students. We sell laptop computers to college students.
- ii. What is the product(s)? Laptop Computers

### 2. Mission Statement

- i. College4Less's mission is to offer quality name brand technology to college students.

### 3. Company Structure

- i. General Partnership - a business entity that is made up of two or more entities to carry on a trade or business. Each partner contributes money, property, labor, or special skills and each partner shares in the profits and losses from the business.
- ii. Status of business – Start- Up Phases

### 4. Target Market(s)

- i. Who are the customers?
  1. College Students
  2. B2C (business to consumer) - A transaction that occurs between a company and a consumer, as opposed to a transaction between companies. The term may also describe a company that provides goods or services for consumers.

### 5. Current Opportunity

- i. Why is the opportunity currently available to you?
  1. New idea targeting solely college students
  2. Our competition includes all online stores that sell laptop computers

### 6. Projection of Business Future

- i. What is the future of the business?
  1. A timeless opportunity
  2. Why? College attendance is on a constant rise

### 7. Financial Summary

- i. Total amount of funds sought for venture: \$ 20,000
- ii. Total amount of estimated startup costs: \$ 10,000
- iii. Total amount of projected average monthly expenses: \$ 5,000
- iv. Total amount of projected average monthly revenue: \$ 5,000

## II. Market Analysis

1. Determines access to the market by studying the industry, competitors and customer demographics (so you can choose a target market).
2. Industry, Yesterday, Today and Tomorrow
  - i. Online Shopping Industry is at high levels currently and is expected to increase by 62% by 2016. As of January 31, 2011 US eCommerce and Online Retail sales projected to reach \$197 billion, an increase of 12% over 2010. According to OnlineRetailer.com, online shopper in the US will spend \$327 billion in 2016, a 45% increase from 2012.
3. Demographics & Target Market
  - i. Colleges are all over the US and college attendance has increased over the years, that alone will create a widespread of our target market.
  - ii. Market Segments can include:
    1. College Education Level

## III. Marketing Strategy

1. Build strategy from core competencies (quality, speed, service, product, price, convenience, location, etc.) The strategy is to tell customers what you will do better than the competition. Customer must be able to clearly see value.
2. Product/Service
  - i. Laptop Computers by Acer, Apple, Alienware, Dell, HP, Sony, and Toshiba.
3. Sales Strategy
  - i. Internet Based Store
4. Promotion
  - i. How will you promote your product/service to the customer?
    - i. Online Ads
    - ii. Billboards
    - iii. College Event Boards
    - iv. Mailings
    - v. Discount Text Codes
5. Pricing Strategy
  - i. Penetration pricing strategy
    1. Price charged is set artificially low to gain market share. Once achieved, price is increased.
  - ii. Follow-the-leader pricing strategy

- 1. Set price based on competitors (leads to "price wars").
- iii. Variable pricing strategy
  - 1. Price fluctuates based on (changing) cost of production.
- iv. Economy Pricing
  - 1. No frills low price; the lowest possible regardless of what other are doing. Cost of marketing and manufacture are kept at a minimum.
- 6. Web Strategy
  - i. What will you use your web site for?
    - i. simply marketing,
    - ii. sales transactions,
    - iii. inventory

#### IV. Operations Plan

How product is made and/or services fulfilled and other core characteristics of your business:

- 1. Location
  - i. 9200 University Blvd North Charleston, SC 29406
- 2. Operation
  - i. When business will: April 2013
  - ii. Hours: 24/7/365
- 3. Organization Structure
  - i. General Partnership
- 4. Employees
  - i. Number of employees needed - 2
  - ii. List each position and what its primary responsibilities will be
    - i. Update Website
    - ii. Add New Items
    - iii. Process Orders to be shipped
  - iii. Type of employees needed (special skills, knowledge or education)
    - i. Experience with E-Commerce
    - ii. Basic Computer Knowledge
- 5. Capacity:
  - i. How much product/service can you provide in a certain time frame.
- 6. Critical Suppliers – Manufactures of the laptop computers
- 7. Financial system.
  - i. Self – Managed
  - ii. Transactions will process through PayPal
- 8. Computer system.
  - i. PayPal
- 9. Equipment

- i. Computers
- ii. Tools
- iii. Displays
- iv. Vehicles

#### 10. Permits and Licenses

- i. Business Permits
- ii. Business Licenses

#### 11. Insurance

- i. Type
  - 1. Product Damage/Defect
  - 2. Product Theft/Loss

#### 12. Contracts

#### 13. Patents and Copyrights

- i. College4Less Name Copyright

### V. Financial Plan

#### 1. Product Pricing

- i. HP Computers \$325/each
  - 1. HP - 15.6 Pavilion Laptop - 4GB Memory - 500GB Hard Drive
  - 2. HP - 15.6 Pavilion Laptop - 8GB Memory - 750GB Hard Drive
- ii. Acer Computers \$300/each
  - 1. Acer - 11.6 Aspire One Laptop - 2GB Memory - 320GB Hard Drive
  - 2. Acer - 15.6 Aspire V3 Laptop - 4GB Memory - 500GB Hard Drive - Midnight Black
  - 3. Acer - Aspire AS5250-E354G32Mnkk 15.6 Notebook - AMD E-350 1.60 GHz
- iii. Alienware Computers \$350/each
  - 1. Alienware - 14 Laptop - 6GB Memory - 500GB Hard Drive
- iv. Apple Computers \$999/each
  - 1. Apple MacBook Air 11.6in Laptop
  - 2. Apple MacBook Pro MD101LL/A 13.3-Inch Laptop
- v. Dell Computers \$350/each
  - 1. Dell - 15.6" XPS Laptop - 8GB Memory - 750GB Hard Drive
  - 2. Dell - 15.6" Inspiron Laptop - 8GB Memory - 1TB Hard Drive
- vi. Sony Computers \$400/each
  - 1. Sony VAIO E Series SVE15115FXS 15.5-Inch Laptop (Aluminum Silver)
  - 2. Sony VAIO E Series SVE15112FXS 15.5-Inch Laptop (Aluminum Silver)
- vii. Toshiba Computers \$299/each
  - 1. Toshiba Satellite L755D-S5162 15.6 -Inch Laptop (Silver)
  - 2. Toshiba Satellite L855D-S5242 15.6-Inch Laptop (Mercury Silver)

#### 3. Funding Source(s) – Business Loans

803-466-8651

**Permanent Address**  
1721 Thorndyke Drive  
Columbia, SC 29204

**School Address**  
Charleston Southern University  
CSU Box #837 P.O. Box 118087  
Charleston, SC 29423

## EDUCATION

Charleston Southern University, Charleston, SC  
Bachelor of Arts in Computer & Information Sciences, Expected May 2013

*Additional Certifications:* CPR/First Aid, Bloodborne Pathogens, AED, 2012

## INTERNSHIPS

**AKA Peace Corps Campus Ambassador**, Peace Corps, Charleston, SC September 2012 - Present

- Share information with university faculty and students about Peace Corps programs and resources
- Promote Peace Corps events, recruitment, webinars, and quarterly deadlines
- Find new creative ways to reach out to the community about the Peace Corps

**Community Resource Intern**, Trident United Way 211 Hotline, Charleston, SC August 2012 - Present

- Updated organization resources using ServicePoint and CommunityPoint Databases
- Researched available resources to residents of Trident area in crisis
- Provided administrative support for various events and networking sessions
- Conducted training for volunteers on website based updating of resources
- Diagnosed database glitches

**Clerical Specialist**, South Carolina Student Loan, Columbia, SC June-August 2008

- Reviewed loan default rates for individual student loans using a strategic report for financial aid analysis
- Researched customers' last known addresses, workplaces, and phone numbers
- Entered confidential student loan information into and account database
- Provided administrative support for various events and networking sessions

**C.H.A.M.P.S. Mentor**, Eastminister Presbyterian Church, Columbia, SC May 2009-May2010

- Served as a positive role model for students between grades 7-12
- Taught students time-management skills, college preparation skills, and provided mentoring and encouragement
- Monitored activities during summer camp and monthly events

## PROFESSIONAL EXPERIENCE

**Assistant Director**, Richland County Recreation Commission, Columbia, SC Summers 2010 -2012

- Created and conducted recreational and learning activities with campers
- Processed Cash and Check Payments
- Supervised over adult counselors and camp participants

**Sales Associate**, Marshall's, Columbia, SC April 2008 -August 2008

- Provided personalized assistance to shoppers in finding merchandise and answering questions about products and services
- Created and updated multiple merchandise displays to highlight specials and new items
- Processed cash and credit card transactions and managed cash register
- Received, organized, and documented clothing and shoe inventory upon arrival

## SKILLS

Proficient in Microsoft Suite applications, great organizational skills, excellent verbal and written communication skills, leadership skills, and experience with C++ and Java programming languages

## ACTIVITIES

- **Volunteer**, Trident United Way, 2012-Present
- **Member** of C.H.A.M.P.S. (Communities, Helping, Assisting, Motivating, Promising Students), Eastminister Presbyterian Church, 2001-2010
- **Member** of Sigma Xi Chapter of Alpha Kappa Alpha Sorority, Incorporated, initiated 2010
  - President, 2011-12
  - Parliamentarian, 2012-13

# Faith M. Brown

1271 Charity Church Rd. Huger, SC 29450 | 843-810-6071 | fmbrown0131@gmail.com

## Objective:

An entry-level position in Computer and Information Systems where my skills and experience will be further developed and utilized.

## Accomplishments:

- Graduated with Honors from High School
- Leadership Awards for JROTC
- Hope Scholarship
- Top 30% of Graduated Class

## Employment History:

July 2012-Present

Hawkes Learning System Mount Pleasant, SC

Technical Support/Development Intern

[TECHNICAL SUPPORT]

Provides technical support to customer, answering any questions regarding the software, troubleshooting

[DEVELOPMENT]

Coded UI Testing, VBScript, Testing product prior to release, pair coding

February 2012-July 2012

Wal-Mart Mount Pleasant, SC

Customer Service

In charge of processing returns, cashing payroll checks, and Money Gram services for customers and helped with any questions regarding merchandise and/or its policy

## Education:

2010 Charleston Southern University North Charleston, SC

Seeking Degree in Computer and Information Systems

2006 Hanahan High School Hanahan, SC

High School Diploma GPA: 3.79

## Skills and Abilities:

[Testing]

- Coded UI Test
- Testing products prior to release

[Technical Support]

- Troubleshooting
- Answering questions regarding various products

[Coding]

- VBScript
- Pair Coding

[Communication]

- Calling many instructors and students regarding technical issues/follow-ups
- Documenting all calls and details of calls

## **College4Less Timeline**

### **○ Spring 2012**

- Started Senior Project Sequence
- Planning of Senior Project (What to do and how?)

### **○ September 2012**

- All Pages for each item are complete in basic design
  - Details for each item
  - Add to Cart Buttons that link to PayPal Cart
- Brainstorm Homepage layout design

### **○ October 2012**

- Homepage will be implemented
  - Navigation Buttons
  - Designing of Category Links /Item Links
- Ensuring that all links are working properly on Homepage and Item Pages

### **○ November 2012**

- Make sure that all PayPal buttons are working properly and processing transactions
- Linking of pages to Homepage Navigation Buttons
- Creating a View Cart Button on homepage and each item page also

### **○ Winter Break 2012**

- Finishing Touches on Basic Design on Item Pages
- Check linking between pages

### **○ February 2013**

- Enhance Item Page and Homepage Graphics
  - Picture Slideshows, Roll Over Buttons, Etc...
  - Possibly add in JQuery for Animations to WebPages
- Reduced Inventory to 14 Laptops

- **March 2013**

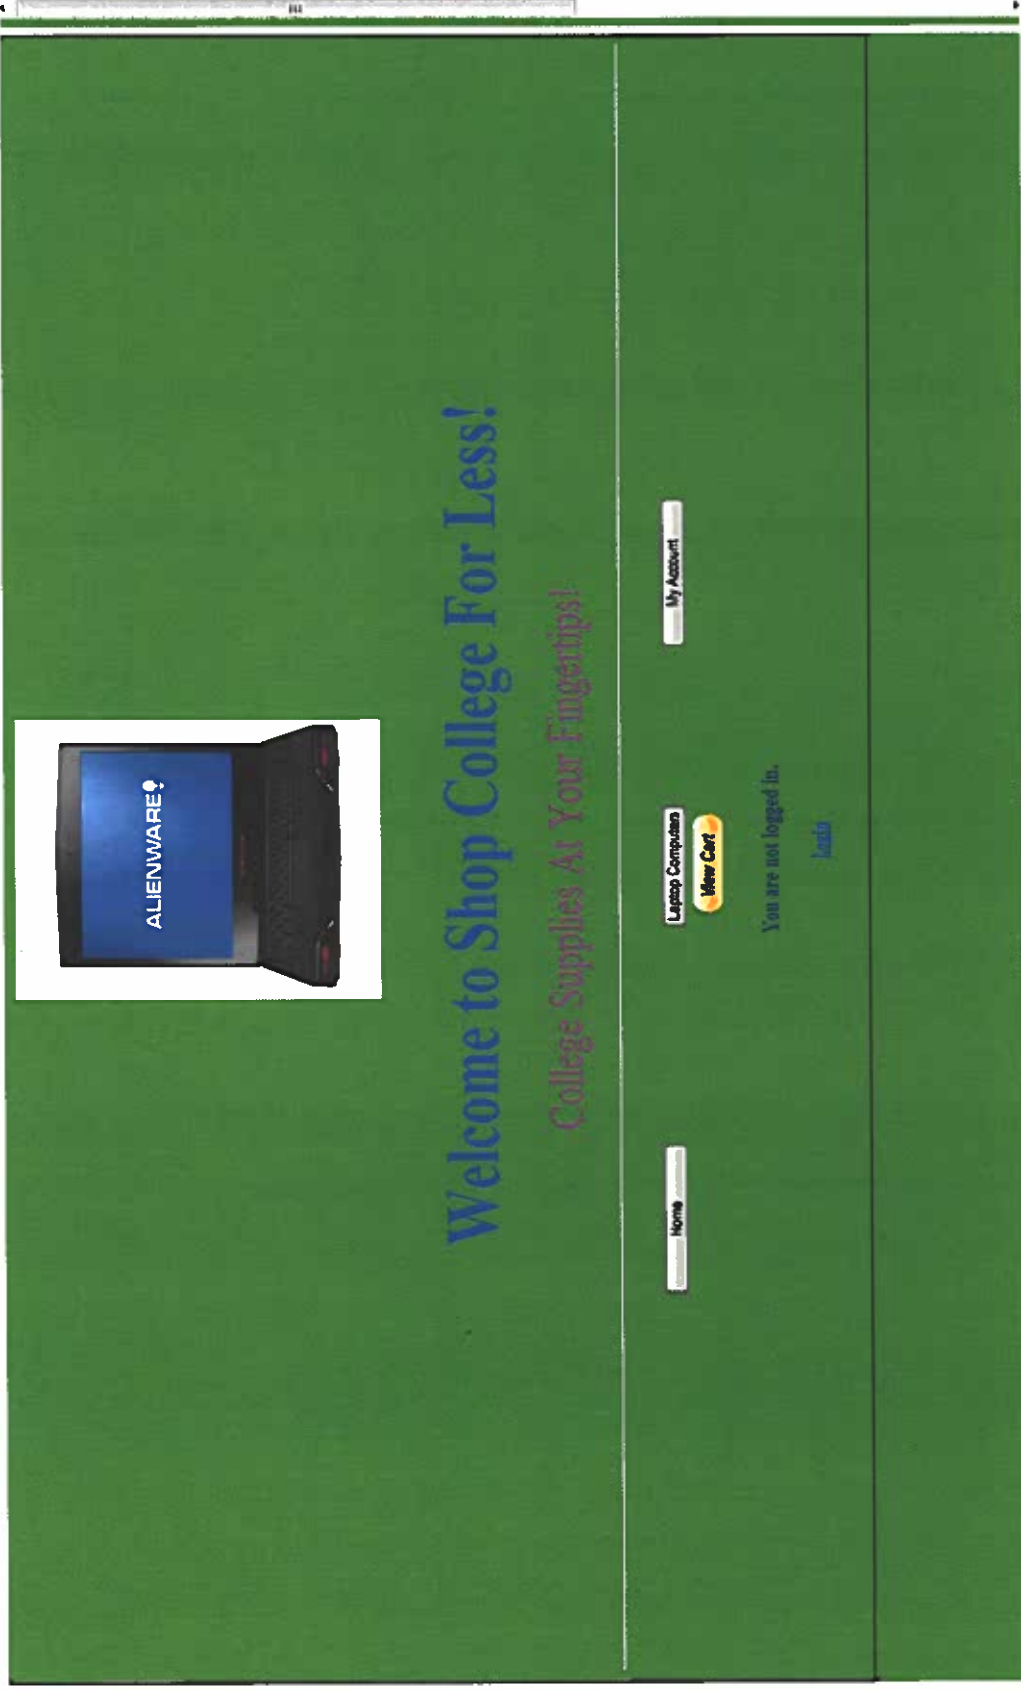

- User Logins and Passwords for Students
  - Making sure that logins pass a validation process
  - Linking User Accounts Database to the code
  - Learning ASP.NET Capabilities and Features
- Overall Testing in preparation for defense

- **April 2013**

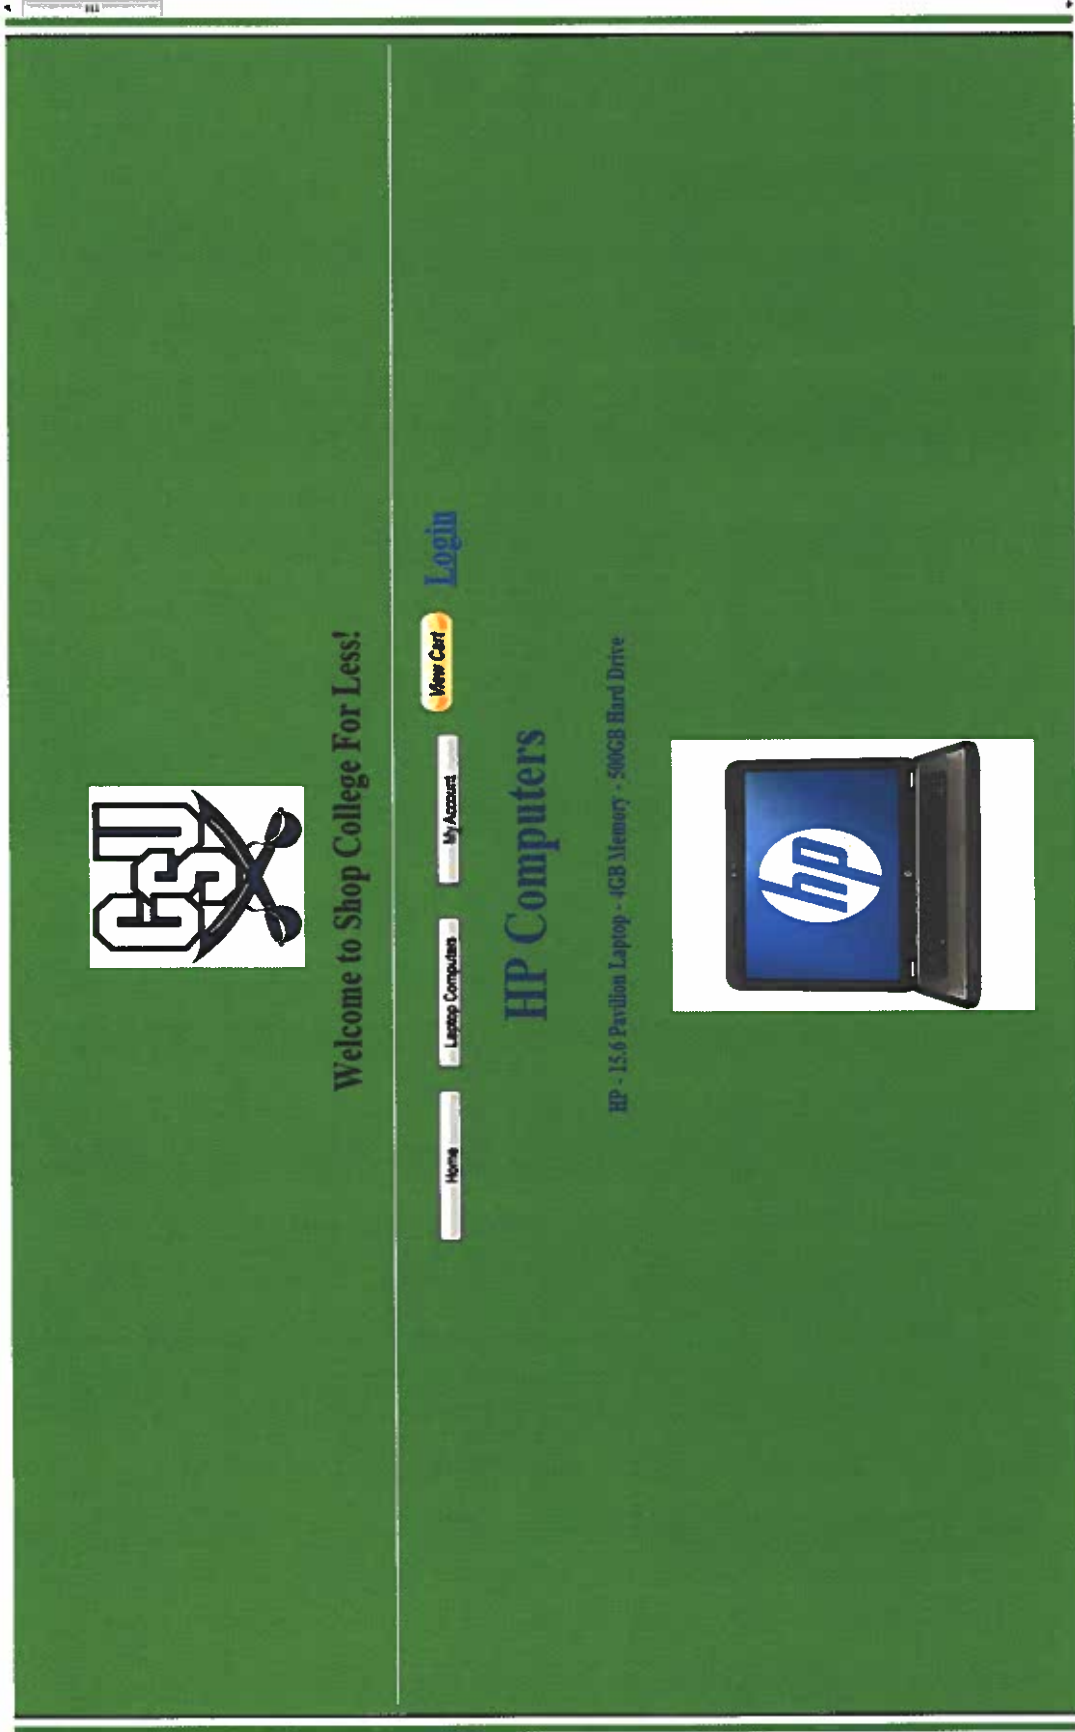

- Complete Defense Documentation
- Final Touches
- Defense Presentation April 22,2013

## How College4Less Works: A Screenshot Step-Through

The College4Less Homepage is where users will see a slideshow of all the laptop computers that we carry, they will have access to the my account page for users to login and they will also be able to view their PayPal cart for items they may have already added.

If a user is on the website to see what Laptop Computers we have to offer they will see this and will have the navigation buttons and will need to login next or create an account.

<p>Enhance your productivity on the go with this HP Pavilion g6-
1d11dx laptop that features built-in wireless networking for
quick and easy Internet connections. </p>
<p>The multiformat DVD±RW/CD-RW drive lets you make custom CDs
and DVDs.</p><p>
• Windows 7 Home Premium installed</p><p>

What's Included</p><p>
• HP 15.6" Pavilion Laptop - 4GB Memory - 500GB Hard Drive</p>
<p>
• 6-cell lithium-ion battery</p><p>
• 65W AC power adapter</p><p>
• Software: Windows Media Player and more</p><p>
• Owner's manual</p><p>
Product Features </p><p>
• VISION Technology by AMD</p><p>
Makes your digital photos and Web sites look amazing and gives a
boost to digital music playback.</p><p>
• AMD Quad-Core A6-3420M Accelerated Processor with AMD Radeon
HD 6520G discrete-class graphics</p><p>
For powerful performance. </p><p>
• 4GB DDR3 SDRAM</p><p>
For multitasking power, expandable to 8GB. </p><p>
• Multiformat DVD±RW/CD-RW drive</p><p>
Create custom CDs and DVDs and watch your favorite movies on the
go. </p><p>
• 15.6" LED-backlit high-definition widescreen display</p><p>
With BrightView technology and 1366 x 768 resolution showcases
movies and games in stunning clarity. </p><p>
• 500GB hard drive (5400 rpm)</p><p>
Offers spacious storage and fast read/write times.</p><p>
• AMD Radeon HD 6520G discrete-class graphics</p><p>
Feature up to 2037MB video memory for lush images and vivid
detail. HDMI output for connection to an HDTV. </p><p>
• Built-in webcam with integrated digital microphone</p><p>
Makes it easy to chat with and send video mail to family and
friends. </p><p>
• Multiformat digital media reader</p><p>
Supports Secure Digital, Memory Stick, Memory Stick PRO,
MultiMediaCard and xD-Picture Card formats. </p><p>
• 3 high-speed USB 2.0 ports</p><p>
For fast digital video, audio and data transfer. </p><p>
• Built-in high-speed wireless LAN (802.11b/g/n)</p><p>
Connect to the Internet without wires. </p><p>
• Built-in 10/100Base-T Ethernet LAN</p><p>
With RJ-45 connector for quick and easy wired Web connection.</p>

```

<p>

- Weighs only 5.2 lbs. and measures just 1.4" thin</p><p>For easy portability. Full-size keyboard enables easy typing.</p><p>
- HP Imprint finish in pewter</p><p>Offers a sleek, stylish appearance. </p><p>
- Microsoft Windows 7 Home Premium Edition 64-bit operating system preinstalled</p><p>Provides a stable platform for word processing, Web navigation, gaming, media storage and more. </p><p>
- Software package included</p><p>With Windows Media Player and more. Microsoft Office Starter 2010 also included (product key card required for activation; sold separately). </p><p>
- ENERGY STAR qualified</p><p>Designed to use less energy and meets strict energy efficiency guidelines set by the Environmental Protection Agency and U.S. Department of Energy.</p><p>
- AMD, AMD Arrow logo, AMD Athlon, QuantiSpeed, AMD PowerNow! and combinations thereof are trademarks of Advanced Micro Devices, Inc. </p>

LIVE DEMO

## Challenges Along The Way

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

baseline

100

[illegible]

© 2001 by John Wiley & Sons, Inc.

## Spring 2013 Timeline

- Inhouse Item Page and Homepage Graphics
- Reduce Inventory to Laptops Only
  - 14 Laptops
- User Logins and Passwords
  - Learning ASP.NET Capabilities and Features
  - Making sure logins pass validation process
  - Linking accounts
- Overall Testing in preparation for deployment
- Complete Defense Documentation
- Final Touches

**Return Possibilities:**

1. The first part of the paper is devoted to the study of the asymptotic behavior of the solutions of the system (1) as  $t \rightarrow \infty$ . It is shown that the solutions of the system (1) tend to zero as  $t \rightarrow \infty$  if and only if the matrix  $A$  is Hurwitz.

Chelseaa Harrell

# Background of Project

- College4Less is an online store targeting college students interested in purchasing laptop computers.
- The project ties together the computer science and business aspects of the Bachelor of Arts Program.
- The ability to combine business courses such as Accounting, Business Finance, Management, Marketing and more.

# Fall 2012 Timeline

- Brainstorm Homepage layout/design
- Homepage implemented
  - Navigation Buttons
  - Design of Category links/Item Links
- All pages for each item are complete in basic design
  - Details for each item
  - Add to Cart Button that links PayPal Cart
- Ensuring all links work properly on Homepage and Item Pages
- Make sure that PayPal Buttons work properly and are processing transactions
- Linking of pages to Homepage navigation buttons
- Creating a View Cart Button on homepage and item pages

# Spring 2013 Timeline

- Enhance Item Page and Homepage Graphics
- Reduce Inventory to Laptops Only
  - 14 Laptops
- User Logins and Passwords
  - Learning ASP.NET Capabilities and Features
  - Making sure logins pass validation process
  - Linking accounts
- Overall Testing in preparation for defense
- Complete Defense Documentation
- Final Touches

# Challenges Along The Way

- ASP.NET user log in pages for website
- PayPal for transactions
  - Buttons
  - Inventory Updates
- User Logins using ASP.NET
  - File Type of Pages
  - Account Authentication
- Formatting The Web Page
- Graphics

# Future Possibilities

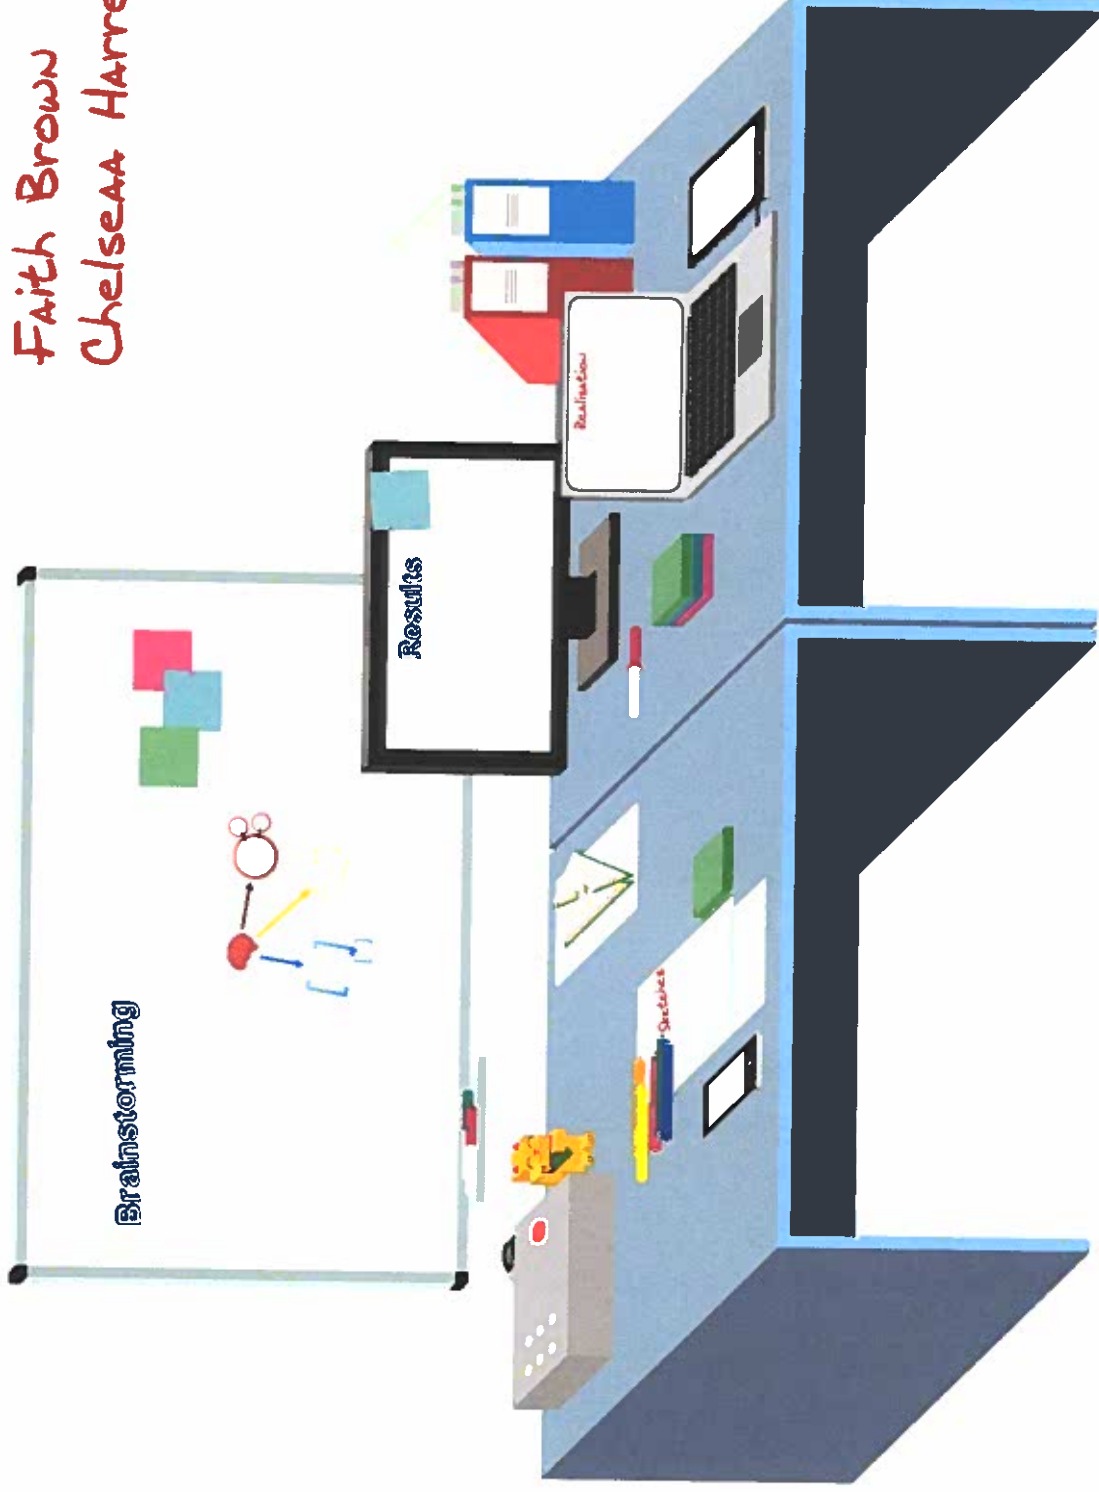

- Search Feature
- Features for Members
  - Wish List
  - Order History

# College 4 Less

Faith Brown  
Chelsea Harrell

Advisor: Dr. Valerie Sessions

Date: April 22, 2013

# College4Less Executive Summary

## Background of College4Less

College4Less is an online store designed for college students to purchase laptop computers. Our project ties together the computer science and business aspects of the Bachelor of Arts program. The required business courses include Accounting, Business Finance, Management, Marketing, etc. All of those courses played a huge role in the planning of our company.

## Brief History of the Online Shopping

Online shopping has become extremely popular within the last couple of years. Shopping malls depleted and many other businesses have been wiped out. Online shopping is a form of electronic commerce, providing customers with more flexibility and availability of products. On August 27, 1979, Michael Aldrich invented online shopping using videotex technology. He designed, manufactured, sold, installed, maintained, and supported online shopping systems. Aldrich was a rediffusion computers employee. From that day, the foundation for e-commerce and online shopping was laid and the internet expanded even more. On January 10, 1984, Gateshead SIS/Tesco is the first Business to Customer online shopping. Mrs. Snowball, 72, was the first online home shopper. The United States is home of the largest online retail companies, eBay and Amazon.com. On July 5, 1995, Jeff Bezos launches Amazon.com. Months later September 3, 1995 Pierre Omidyar launched eBay. Since the launch of those companies, companies have created stores and applications for customers. In December 1998, PayPal launches. PayPal is an online payment company and an eBay company. The service has expanded and customers can now make payments by mobile device or in stores. Online shopping as made a major impact on the survival of the internet and businesses as well.

## Implementation of College4Less

When we started our project, we were using HTML and Cascading Style Sheets. When we started implementing user logins, we had to change the actual webpage files from htm to aspx format. That type of page created more flexibility for our pages and implemented the user logins. Along with those other languages, we began using ASP.NET and C# as well.

During the course of this project, we incorporated two other applications, Google Drive and Trello. These applications have made it easier to share files and keep up with project progress.

Google Drive is an application that allows users to create new documents, work on old documents with collaborators, share files, etc. The application was used to store our project files and when changes were made, they would re-sync on each account and keep an activity log for each file. This application is portable, allowing you to work from anywhere. It can be downloaded on your PC, Mac, Android, or iPhone/iPad devices.

“Trello is a collaboration tool that organizes your projects into boards. In one glance, Trello tells you what's being worked on, who is working on what, and where something is in a process.” This application supports Google Chrome, Safari, Firefox, and Internet Explorer browsers. Trello also is available on the iPhone, iPad, Android, and Windows 8 Platforms.

### Challenges Along the Way & Proposed Solutions

For our online store, we used PayPal to process transactions and manage our inventory. PayPal allows us to create buttons to view the cart and add a cart buttons for each item. We ran into issues where if the button were moved then it would do nothing when clicked. The code was actually being separated all throughout the code for that file. So this required a tedious amount of work because if the button was moved on each page, then all have to be fixed. When we started adding the add to cart buttons, a customer was able to choose how many they want on our page and then add to cart on PayPal. Problem was the quantity on our page was not linking to the PayPal cart; this posed an issue because we create the button, PayPal creates the code for that to ensure its going to the correct item and company cart. We had to remove this feature because it was not functioning properly when redirected. Customers do still have that feature on the cart to change their quantity.

ASP.NET was something that we touched on in networking courses, but the capabilities we have learned benefited our project heavily. User Logins was one of the components of our project that we learned a lot using ASP.NET also. Originally, all of our pages were htm pages and when we learned about implantation of the logins we had to change each file type to aspx file types because htm was not properly linking. We had also thought that some pages were lost because we could not locate them in the Visual Studio Project itself. The file types made a huge deal because we did not have to start completely over. We just were able to using html features and login features, such as hyperlinks, login windows, etc. We had no idea where to start. Multiple tries users' login information would not login even though passwords were correct. We had accounts having to recreated because a user' would not be able to access an original one. User Logins and ASP.Net meant a lot to our project because we gained a major feature overall.

The appearance of a Webpage is vital. When adding buttons and such, that code would get out of place based on where things were. We would add a button, and the text would get completely out of place and would unformat other parts. This would happen too often, and was a tedious process. Style boxes on the page would be empty and take up space but if deleted would affect the layout all over again. Changing sizes of boxes helped with this and constantly testing. Besides text being unformatted, Images would do the same thing. Graphics would be something that we did not put as much time into it that we should have and could have. We have no knowledge of graphic design, so this created a problem. Even checking out books from the library did not make situations any better.

Throughout all of these challenges, we both have taken something from it individually. I have learned about other services the make projects run well and were about to implement then.

### Project Summary

Our experience was beyond educational. From research or reading books, every action made was well spent. Our major concern about this project was whether it would help us apply what we have learned in a classroom and learn beyond that. In networking courses, we touched the surface about asp.net, htm, and cascading style sheets, hyperlinks, and place text on the screen, etc. Being able to link multiple pages and implement user logins were things that we had to learn more about and implement it as well. We ran into a number of issues using PayPal and that is what pushed us to find ways to solve the issue and prevent it from repeating.

We also had to incorporate online applications that would make our projects flow freely. Google Drive and Trello allowed communication and shared files to be more effective. Prior to learning about those, we would have to email back and forth. That created an inconvenience for progress because we may have a file the other does not.

The computer and information sciences curriculum including a number of required business courses that applied to our project. Since we created a company, we needed a Business Plan, which would outline College4Less as a company and not just a website. Through all of this, we have applied COINS courses and Business courses to expand.

### Future Possibilities

Compared to other websites, College4Less is missing a great deal of features. We would like to expand our inventory to computer accessories to provide flexibility. The ability to search for an item is important as well if a user does not have time to scroll through our page. We would also like to expand features such as a wish list, order history, etc for the user accounts. The wish list feature would allow customers to keep track of an item they may want, but cannot purchase now, or would be able to share the link with someone. The order history feature would track a history of everything they have purchased. These features would enhance the user experience.
