Course Evaluations

Charleston Southern University

Background

Charleston Southern University (CSU) is an organization that focuses on education. CSU primarily targets individuals on the undergraduate and graduate level. The industry is very competitive and ever changing. Since students are their customers, CSU needs to effectively serve their needs, while competing with other institutions in the area and across the world. CSU is a private institution, and does not receive the same government funding as public schools. CSU measures the quality and success of the organization by the number of successful graduates along with the placement into the job market. Their mission is to promote academic excellence in a Christian environment.

Problem Statement

CSU is currently using hand-written course evaluations, and would like to upgrade its course evaluation process without losing student and faculty participation. One of the major problems currently encountered by the staff at CSU is the need for manual entry of student responses for the Administration department. The process for entering the data takes approximately 150-200 hours to complete in the fall semester. The present costs for these course evaluations are estimated to be \$700 per semester for supplies without including labor costs. Also, the student responses are inaccessible for

many departments before the following semester begins. These course evaluations are usually not complete until the following February.

The current participation rate is estimated to be 67%, because the course evaluation is usually offered one day out of the semester. Any student who is absent that specific day is not given a chance to take the course evaluation. In addition to concerns about participation, any new system would have to meet security standards.

The application will require different levels of security to ensure the data will not be altered. According to the Course Delivery Technologies Specialist at Kettering University, there are minor problems with implementing their new system using Blackboard. One problem is that students are not accustomed to taking evaluations online through Blackboard. Each student will need specific instructions to ensure the evaluation is completed properly. Another potential problem is that the students might be concerned that the evaluations would not remain confidential. To eliminate this problem, it was suggested to include a short explanation about how confidentiality is maintained.

Objectives

The primary business benefits obtained by the new system will increase efficiency and productivity. The most obvious benefits will be the following:

- Eliminating the need for multiple manual entry of the data
- Reduce errors resulting from manual multiple input by 100%
- Reduce the need for future hiring in Admissions and Administration

- Result in cost efficiency associated with the increased productivity of the staff
- Accessibility provided by increased use of the Internet
- Reduce labor hours of staff from 150-200 hours to 20 hours
- Increase response rate from 67% to 100%
- Reduce costs from \$2,100 to \$1,650 per year for supplies
- Retain anonymous course evaluations

System Capabilities

The course evaluation process will begin through software named Respondus. The campus-wide version of Respondus offers a batch file option which allows the administrator to upload the survey to multiple courses at one time. Based on CSU's expected enrollment of 3000 students per semester, the software has an estimated cost of \$1,650 per year with a \$200 one-time activation fee. Each course evaluation will be loaded into a shadow or copy of the original course. These shadow courses are only available to the students for a selected amount of time. Administration will inform each instructor of the time period the course evaluation will be offered so they can relay the message to the students. Students will also be informed through e-mail. Before the instructor is able to view their results the data will be saved into a secure database. After an instructor submits their grades for a given semester, each instructor will be enrolled into the evaluation classes so the results can be viewed. To obtain the business benefits listed above, the application will need the following:

- Provide Blackboard availability 24 hours a day, 7 days a week

- Unified file system for both Administration and Admissions
- Secure Blackboard environment for transmitting, receiving, and storing data
- Incorporate previous records into the new system without compromising data integrity

Project Scope

All the upgrades will be done through the use of Blackboard through a class evaluations link. The shadow courses within Blackboard will include all the students currently enrolled but a designated administrative staff will be assigned as the instructor. This prevents the instructor from being linked to the course evaluations.

Office of Institutional Effectiveness

Memorandum

DATE: March 2, 2004
TO: Faculty
FROM: Jeff Babetz
Director of Institutional Effectiveness
RE: Spring 2005 Course Evaluations

Instructor Procedures:

1. Complete Course Evaluation March 14-18th.
2. Return evaluation packets by March 21st.
3. Review packet contents.
4. Complete the Instructor's Questionnaire before class and put it back in the packet.
5. Immediately prior to the evaluation:
 - a. Write on the board the four sets of numbers from your packet label that the students will need to put on their evaluation forms:

Dept. # _____
Course # _____
Section # _____
Instructor # _____
 - b. Give the packet to the student or instructor designated to monitor the course evaluation.
 - c. Tell the monitor to read aloud to the class the "Monitor Procedures" and to fill in and sign the instruction page.
6. Make no comments to the class about the evaluation or the evaluation process.
6. Leave the classroom for the duration of the evaluation.

Each course evaluation packet contains Course Evaluation Forms, an Instructor's questionnaire and Monitor Procedures. You should set aside 20 minutes at the end of class for students to complete the Course Evaluation Form. Please leave the classroom during this time so that the students feel they can honestly and openly complete the evaluation. If you would prefer, you may ask another instructor to monitor your class during the evaluation. The student or instructor designated to proctor the course evaluation should COLLECT the Course Evaluation Forms and Instructor's Questionnaire and RETURN the packet to Jones Hall between 8:00 a.m. - 5:00 p.m. or to the Library after 5:00 p.m.

Charleston Southern University – Course Evaluation Form

INSTRUCTIONS: Your responses will be read by an optical mark reader.

- PLEASE**
- Use a pencil or black or blue pen.
 - Fill in the oval completely.
 - Erase cleanly any marks you wish to change or "X" out mark if in pen.

NOTE: Questions 12 and 13 should NOT be marked unless they are provided separately by your instructor

SUMMARIZATION OF STUDENT COMMENTS

DEPT: TERM:
 COURSE: TITLE:
 SC:
 LOCATION #ENROLLED:
 INSTRUCTOR: ID#

1. Please comment on the things that the instructor did well.

- a) Very informative about the subject. taught the class very well.
- b) Emphasizes importance of things relating to the world.
- c) Gave out what he wanted students to do and had it accessible to students.
- d) No comments.
- e) He does know what he is talking about.
- f) No comments.
- g) Uses a lot of different ways to teach the class. A lot of group assignments.
- h) He was very understanding for instance if I did not turn something in on time with a logical explanation he understood.
- i) No comments.
- j) The chapter outlines are good study guide.
- k) Present info to class.
- l) No comments.
- m) Expect a lot for seniors which I think is good.
- n) Offered assistance outside of class and held up to high expectations. I felt he tried to see the effort made, not just the end results.
- o) Tough but fair.
- p) No comments.
- q) is extremely helpful outside of class.
- r) Made class interesting & assisted when asked.
- s) is brutally honest about how he feels students are doing. This introduces students to the real world.
- t) No comments.
- u) No comments.
- v) Return assignments on time. Assistable outside the class. Always on time. Good feedback.
- w) Good application of material that directly related to class.
- x) Presented thoughts and ideas well. Provided additional help outside of class. Gave effective criticism on projects.
- y) No comments.
- z) Instructor promotes a competitive environment and offers great constructive criticism. Instructor makes it into my personal top three at CSU.
- aa) Uses a variety of teaching tools, hands on learning.
- bb) No comments.
- cc) No comments.
- dd) He definitely challenges my intelligences, which I love & shows great passion to making sure that we implement our "Skills" to the
- ee) No comments.
- ff) is very excited about this course and is an enthusiastic professor.

2. Please comment on the things that you believe the instructor needs to change.

- a) When asked a question about an assignment, needs to give a straight, definitive answer.

- b) Too much work need outside of the allotted class period. (Group projects!)
- c) Not clearly defining what he expected from students in projects. Need more examples.
- d) No comments.
- e) You need to explain what you want more clearly.
- f) No comments.
- g) Apart of the final grade is based on the
- h) No comments.
- i) He needs to lighten the work load & not have so many different group projects because they conflict with each other and you have to meet about eight different times.
- j) No comments.
- k) The timeline of how assignments are given class load is extremely heavy and instructor basically reviews from prious classes.
- l) I believe that more things need to be thoroughly taught rather than given to us.
- m) Listen to the full situation that's presented before making a suggestion or recommendation.
- n)
- o) No comments.
- p) No comments.
- q) More test.
- r) Workload is too heavy for working adults.
- s) No comments.
- t) The is very in depth, more explanation would be nice.
- u) Recognize a difference that we see not a CEO-s but still a regular student w/out experience.
- v) too much outside group work.
- w) is certainly complicated, too many variables.
- x) When going over chapters, explain the concepts better. Explain assignments better
- y) Perhaps more lead time and video examples of presentation.
- z) Majority of grade is based on Don't know majority of grade until end of semester which is a lot of pressure.
- aa) Grading Scale needs to be changed. Having the final exam be the whole text book is not fair to the students. It would be better if there were test on the text book at regular intervals through the semester. is not an accurate thing to grade. not everything is explained well.
- bb) No comments.
- cc) He needs to make sure that he Explains the course outlook.
- dd) No comments.
- ee) No comments.
- ff) I think more in-semester exams instead of one big final would be much better than having our only evaluation be at the end.

How to Customize Blackboard for Each Evaluation

Each step is performed from the instructor security level. Each series of steps must be completed for each course being evaluated.

Steps:

1. Remove Course Options: Click on the Control Panel. Then under Course Options click Manage Course Menu. Next, click the remove button beside the announcements area. Click ok to finalize the deletion. Repeat this step until all of the areas are deleted. See figure:

2. Create new content area: On the same screen as step one, click the content area button on the Add toolbar.

3. Set the name of the new area: In the second name box, type Course Evaluation. Then click submit. Click ok to continue. A content area named Course Evaluation should appear. Click ok to return to the main control panel. Next, click the refresh button in the web browser to view the changes.

Blackboard Learning ... Document11 - Microsof... Blackboard Learning 2:00 PM

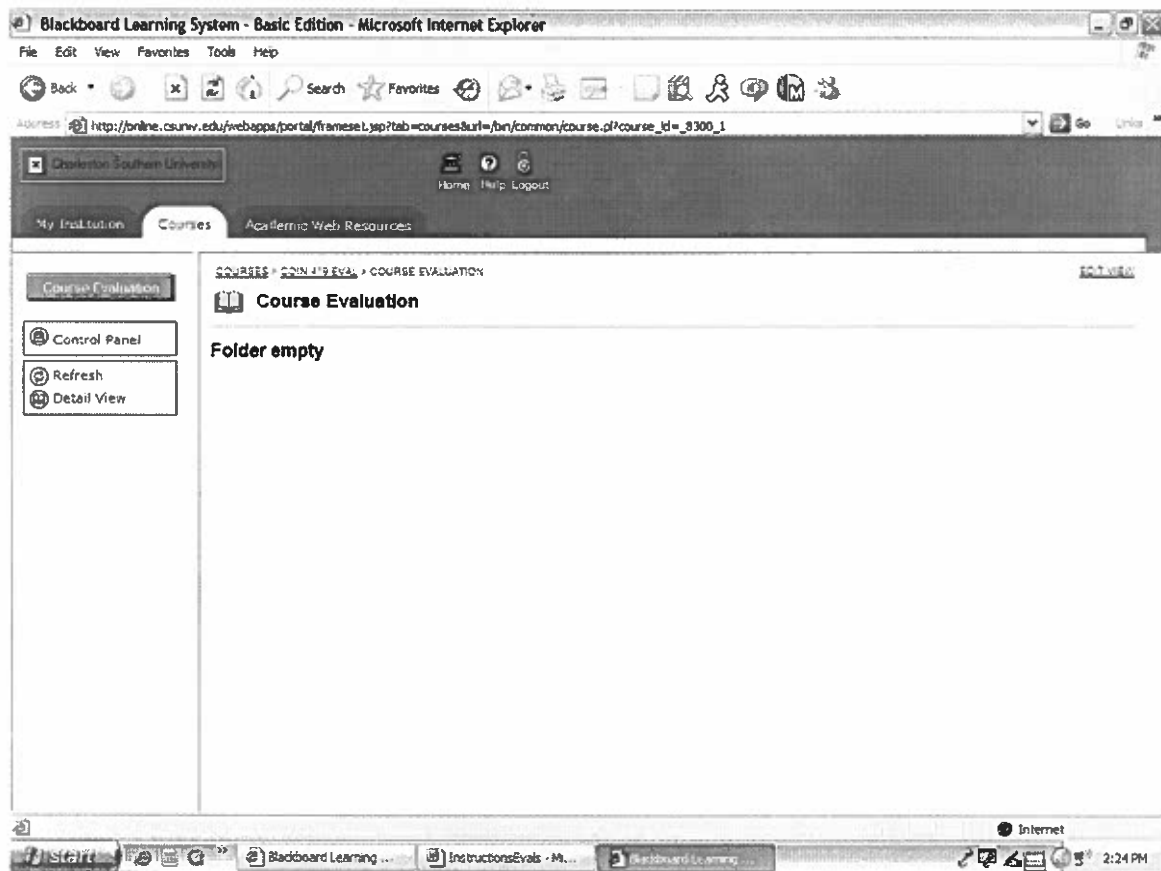

4. Remove the tool options: From the Control Panel click Course Design under the Course Options menu. Next, click Manage Tool Panel. Then click Quick View Tool Panel Options. Within this menu select no for the following options: Display Communication, Display Course Tools, and Display Course Map. See figure:

Click Submit to apply the settings. Then click the web browser's refresh button. (Hint: Click the web browser's refresh button to return to the main view)

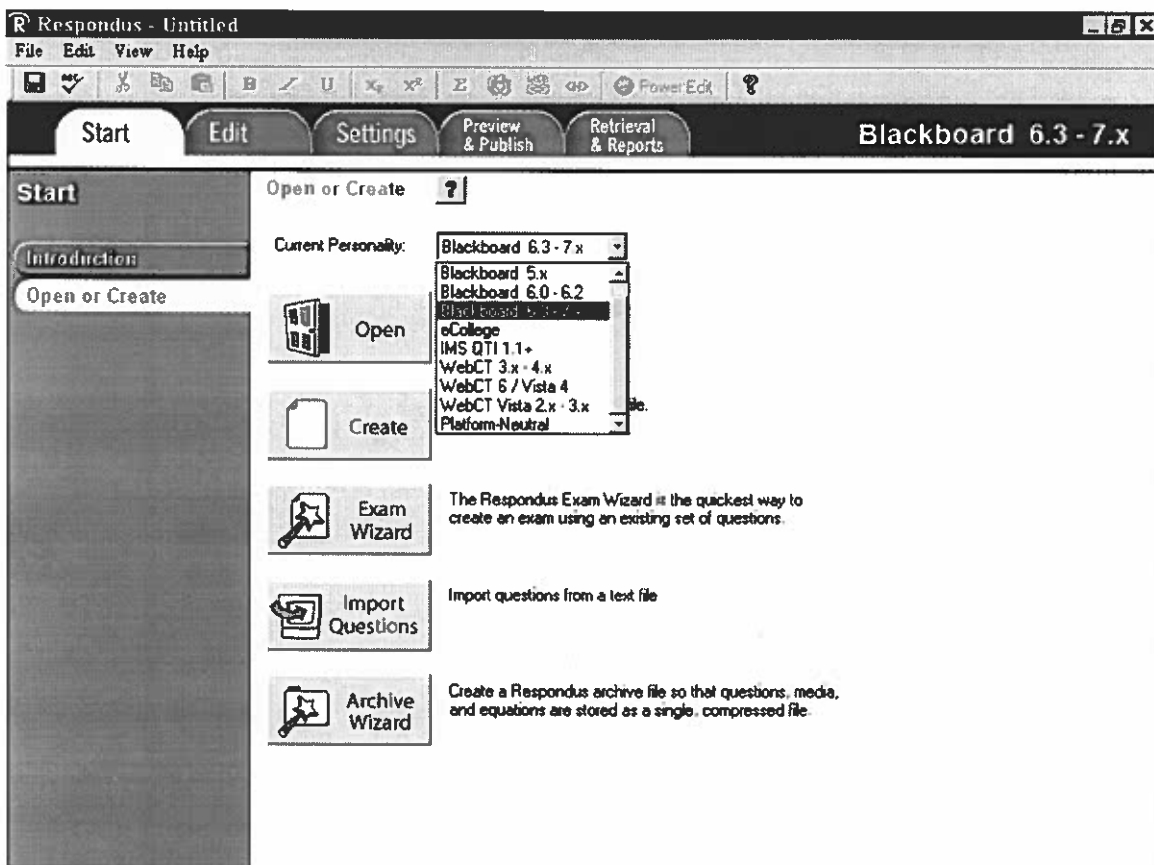

This should be the final result:

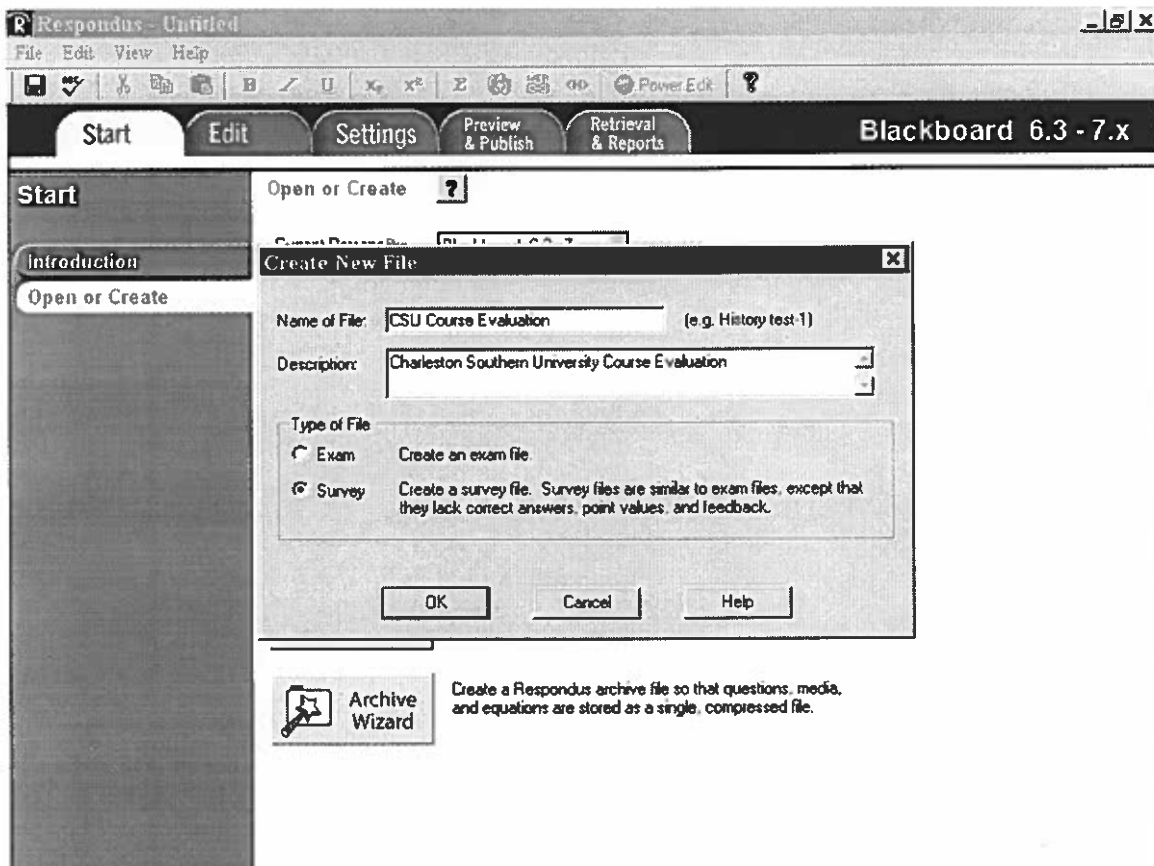

How to Deploy Course Evaluations Using Respondus

Steps:

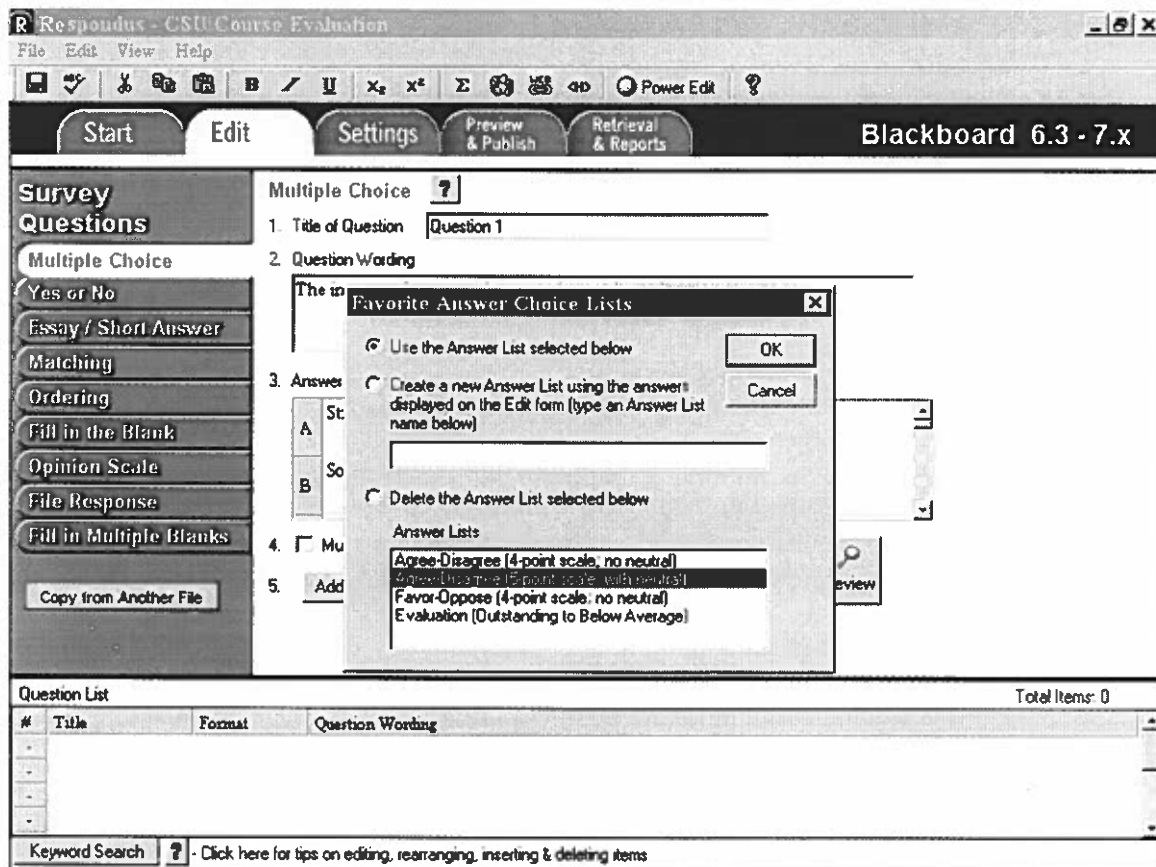

1. Setting Respondus for Blackboard: Open Respondus software. Under the Start tab click the Open or Create button on the left. Next, click the current personality dropdown box and select Blackboard 6.3 – 7.x. See figure:

2. Create the Course Evaluation: If the course evaluation is already created skip to step 3. Otherwise, click the Create tab from the Start menu. From the Create New File window fill in the following information then click ok:

Under the Edit tab make sure Multiple Choice Questions are selected. In the Title of Question box type "Question 1". In the Question Wording box type "The instructor's expectations are clear and consistent.". Click the Favorite Answers Button. From the Favorite Answer Choice List select Agree-Disagree (5-point scale). Click ok. See Figure:

Click the Add to End of List button. The question should be added to the survey. Repeat this process until all the questions are entered. For the two essay questions make sure the Essay/ Short Answer tab is selected. This is how the screen should appear:

Respondus - CSU Course Evaluation

Total Items: 1

#	Title	Format	Question Wording
1	Question 1	Mult. Choice	The instructor's expectations are clear and consistent

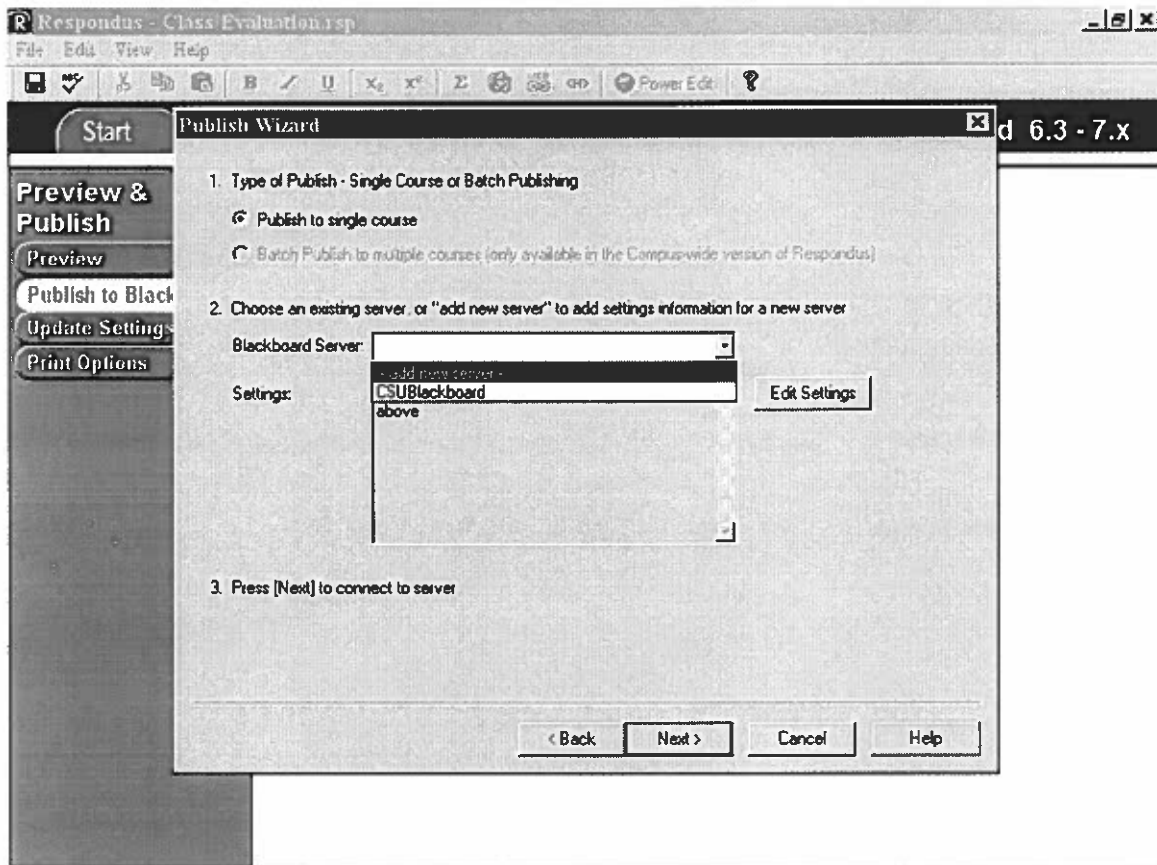

Keyword Search ? - Click here for tips on editing, rearranging, inserting & deleting items

3. Load the Course Evaluation File: This step is used if step two is skipped.

From the Start menu click Open. Locate the Course Evaluation file and click open. See figure:

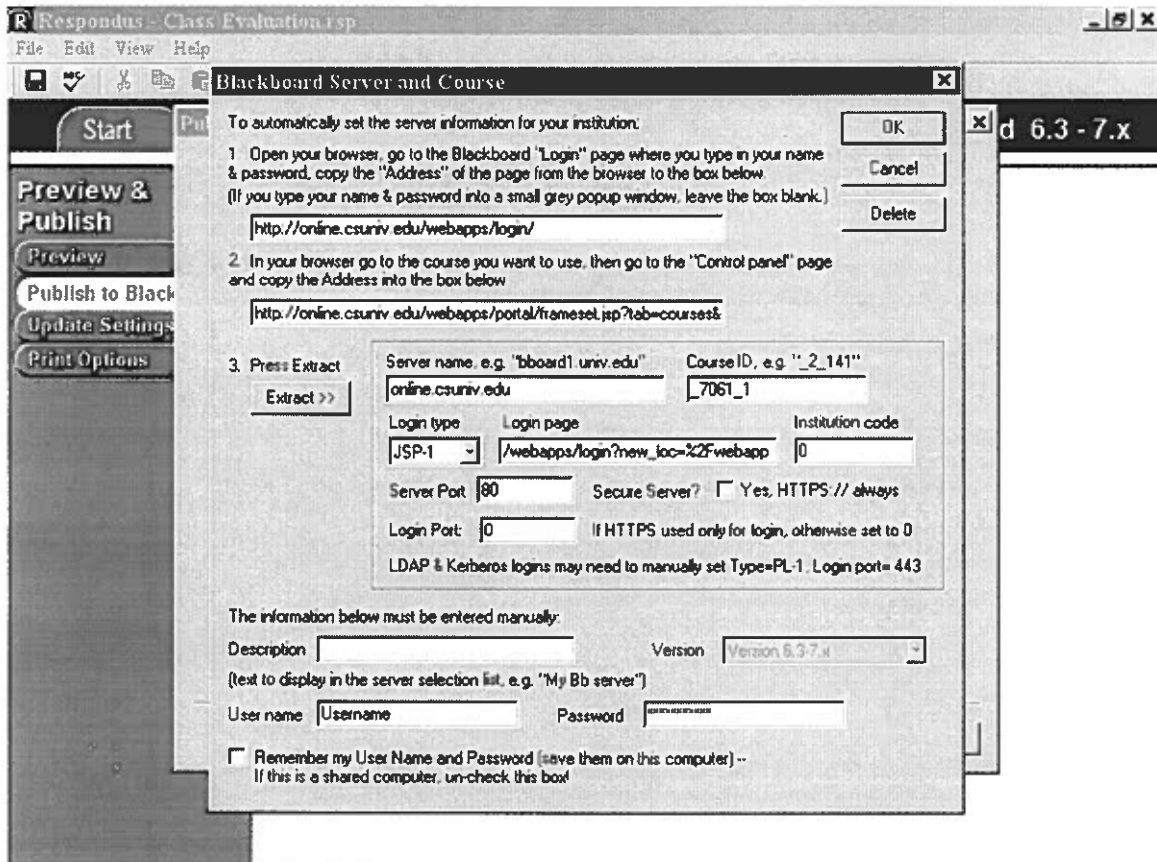

4. Publishing Course Evaluation to Blackboard: From the Setting tab, check the Force Completion checkbox. This forces the student to complete the evaluation once it is started. Next, click the Preview & Publish tab. Click Publish to Blackboard on the left. Click the Publish Wizard button. From the Publish Wizard screen select either to publish to a single course or to batch publish to all courses. Next, in the Blackboard server box click add new server. See figure:

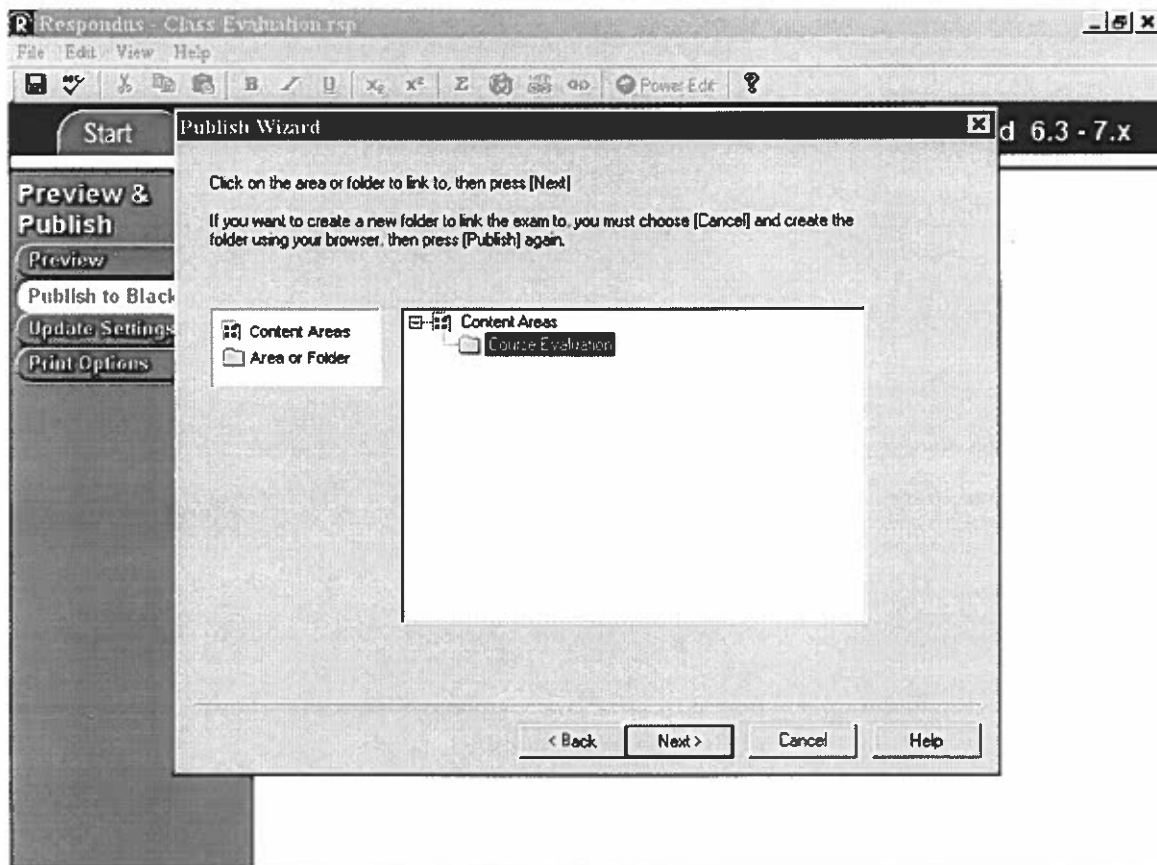

Follow the on screen instructions to answer questions 1 and 2. Click Extract.

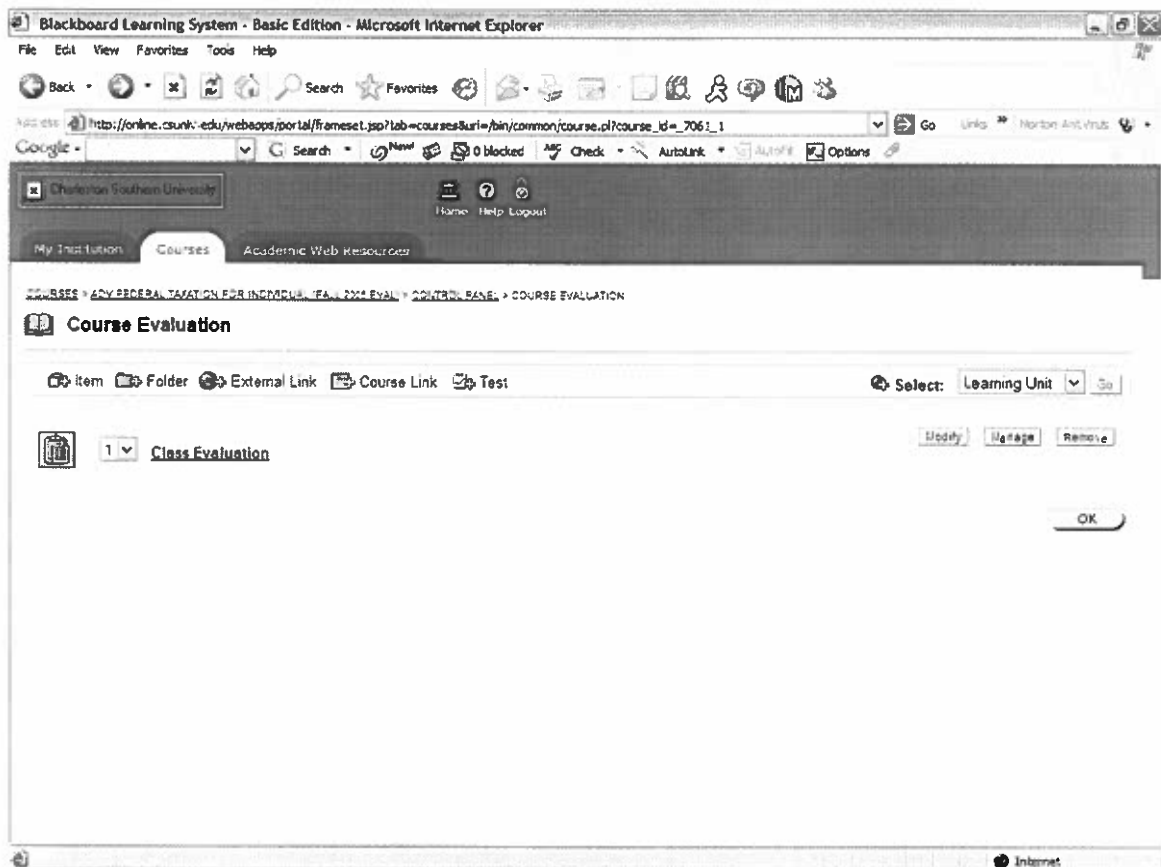

Next, type a username and password in the blank boxes. The screen should look similar to the figure:

Click Ok then Next. Click the dropdown arrow in the Choose Course to Publish to box and select the course. Click next. From the Publish Wizard screen select the course evaluation folder. Click next. The course evaluation should be uploaded to Blackboard. See figure:

5. Update Blackboard: Each course evaluation must be activated within Blackboard. Log into a selected course and open the control panel. In the Control Panel under Content Areas click Course Evaluation. Click modify on the right side. See figure:

Click Modify the Survey Options. Scroll down and under Survey Availability select yes beside Make the Link Available. Click submit then refresh the browser. This completes the uploading process.

Appendix

Blackboard

Appendix

Administrative Services/ Information Systems at CSU

- The current version of Blackboard does not allow that granularity of security. It's an all or nothing type deal
- Can you set the availability for multiple courses at a time or does it have to be done individually? There is not a way to do that from within Blackboard. I can however run a query and generate a script that will set a group of courses available. In Fact, at the beginning of each semester I run a script that makes the previous semester courses unavailable.
- Is there a way to copy the contents of a course to many courses from your side of Blackboard? There is no way to mass copy. I would have to do it one at a time. You're best bet is to export the course and import it to the other courses.
- We are on version 6. Just an FYI, do you plan on running this application as an add-on within Blackboard? If so our version doesn't support that functionality.
- Is there a survey feature in CSU's current version of Blackboard? Yes instructors can create surveys in their courses.
- Do these surveys have to be constructed by each instructor or can they be set to appear in every class enrolled through Blackboard? They have to be set by each instructor.

Assistant Vice Provost of Academic Affairs at The University of Oklahoma

- We have several colleges using the surveys function to perform end-of-course evaluations using Bb with varied success. The tool itself is fine, though other products such as Respondus make it much easier to use, but it is the internal business, political, and other processes that make it difficult. Don't want faculty to see their results until after the semester? Tough. Want department chairs to see all results? Have to add them as instructors to every course. The survey function does what it was designed to do - create and deliver surveys - but sometimes this doesn't meet the need for a particular department or college.
- You can get consolidated results from the control panel view of the survey and can export the records

Associate Professors of Business at CSU

- All courses are evaluated every fall semester. Courses taught by new faculty in the spring semester are always evaluated. Finally, there are usually a few courses that get evaluated by special request in the spring and summer. In sum: all courses in the fall, a fair number every spring and a few in the summer.
- Where did you store the data when you received it? I put the survey in the testing section of Blackboard. Somehow the responses were stored

internally in Blackboard. I was only able to export it as comma delimited data (.csv file) and tabulate it manually.

- Can you use the same survey for multiple classes or is it for one class only?

I used the same survey as instructor-led classes which has inappropriate questions for this purpose.

- Are there any other problems you came across? I could not figure a way to have Blackboard to summarize the data.

Course Delivery Technologies Specialist at Kettering University

- Course Evaluation presentation:

<https://blackboard.kettering.edu/course-evals.html>

- You will have to do the uploads [through Respondus] one at a time. We did that the first two terms. For about 60 courses it took approximately 15 minutes.
- Prior to purchasing Respondus I used the COPYINTO snapshot tool available for enterprise customers. If you are basic you could still use the Copy Course function from the System Admin UI, but it would take some time to do that.
- Are you creating a separate course for each eval? Yes, since we are enterprise, I simply create a course shell for every course being offered in the current term. Then the Institutional Effectiveness office sends me a list of the courses that the evals will actually be given in and I use that to activate the course and pull student enrollments.

- How are you keeping the results private? Once the student's grades are submitted how are you keeping the instructor from seeing the student's name? Until last term we were not keeping the students names private. But prior to enrolling the instructors into the eval course I make an archive of the course so that if a faculty member gets in a deletes a students responses, we have the original survey to refer back to - this has happened once by someone seeing if she could do it. In addition, we added a building block that displays the results of evals to instructors in a portal module so that they do not have to be given access to the course itself. But you would need to be an enterprise customer and have the portal. If you are both of those things, I am happy to share the Building Block with you. It is a work in progress and will be the only way for faculty to retrieve results by early next year.
- Our response rate has been fairly good, but we send several email messages to students and faculty when evaluations are first available and throughout the two weeks. There is only about a 5-6% difference in the overall response rate from the paper evaluations. The biggest problems you will experience are 1) students not familiar with the taking a survey in Blackboard will need very specific instructions on how to do so including someone reminding students to choose the Submit button, and 2) student perception that evaluations are not confidential. For the second point, we include verbage in each course explaining that faculty do not see the results until after the grades are turned in and that we only know who answered not how they answered. I am not sure if your version of Blackboard allows the results to

be downloaded, but if it does I would make it clear to faculty that the results are not in the order that the students appear in the gradebook - in fact every time you download the results, the order of the answers is randomized.

Planning and Institutional Research at CSU

- We require all students to complete class evaluations. However, since the evaluations are only administered once for each class the completion rate will be the same as the average class attendance rate. Last I estimated, that was around 67%.
- We administer the course evaluations to the entire campus during the Fall Semester and to all classes taught by first-year instructors again in the spring. Other administrations are conducted on a request basis.
- From the time that I receive the evaluation packets back into my office, the following procedures take place: 1. packets are checked off list as returned; 2. packet papers are sorted/straightened, removing monitor/instructor forms; 3. the hand written student responses to questions 1 & 2 are typed on a form, one form for each packet; 4. each eval. form in each packet is hand scanned; 5. evaluation forms are returned to their packets and filed alphabetically in our storage closet for reference for one full year; 6. at the beginning of the following year's like semester (ex. fall/04-fall/05) all previous "like" semester eval. forms would be shredded to house the present semester's eval. forms. This is the majority of the work-time spent to process each packet after it has been processed by the students and prior to

the report process. I feel that just for fall, this process takes between 150-200 hours, approximately. Also, this is probably the main area that should be replaced by your project.

- I have made an attempt to compile total material cost for fall evaluations. I am estimating the cost to be approximately \$700. This price includes the following supplies: paper, large envelopes, labels, tape, and copier cost. Some cost will be on-going, so I did not include those in this estimated cost.

Registrar at CSU

- The spring semesters average fewer students, but I expect will still be close to 3,000 for 2006.
- Fall enrollment was 3,022.

Respondus

- General pricing information for our Campus-wide licensing is available at http://www.respondus.com/products/respondus_campus.shtml. Based on a 2,500 - 10,000 FTE level, the annual fee for a Respondus Campus-wide license at Charleston Southern University would be \$1649. Our pricing, however, is prorated based on our August 1 - July 31 licensing period. So the prorated cost for your institution to purchase the Respondus Campus-wide license now through July 31, 2006 would be \$1436 (\$1236 Respondus + \$200 one-time activation fee). I've attached a formal quote that reflects this information.

- Respondus is unable to retrieve reports from multiple courses at the same time. However, I do believe that it is possible to simultaneously retrieve reports from multiple assessments within one course. For more information on retrieving reports in Respondus, please see either the online help or Respondus user guide (<http://www.respondus.com/products/userguide.shtml>).
- The batch publishing tool is indeed only available in the campus-wide version of the software. A Respondus Campus-wide License allows any instructor at your institution to install and use the Respondus software, even on home computers. Technical support and software upgrades are included at no extra charge. Most institutions find this option to be best for them if they plan on having over 10 Respondus users.
