Statement of Scope

Problem Description

The current method of inventory control is completely manual. The actual tracking of raw materials from storage through the work processes requires more time to execute because of this. A count of materials issued to each job is more prone to errors because of calculations performed by hand. Therefore, the project is to be computerized as much as possible to eliminate these problem areas.

Anticipated Business Benefits

- ◆ A more accurate count of materials issued and used per job.
- ◆ A more accurate beginning and ending count of materials on hand.
- ◆ Fewer calculation errors.

Project Charter

Project Name: Inventory Control System

Project Purpose: To provide a faster and more efficient means of keeping inventory of raw materials. Should record materials received, materials issued to jobs, and unused materials returned to inventory

Anticipated Completion Date: April 14, 2004

Project Assigned to: James Carter

Project Schedule and Milestones

January Week One

- Produce Project Charter and Statement of Scope.

January Week Two

- Produce a list of milestones and estimated completion dates.

February Week One

- Create a descriptive table of parts.

February Week Two

- Begin work on a context chart..

February Week Three

- Use context chart and create data flow diagrams from it.

February Week Four

- Produce a table of steel types.
- Produce a table of finished part numbers.

April Week One

- Begin construction of data entry forms for tables.

April Week Three

- Customize data entry forms.

April Week Four

- Normalize tables and establish their relationships.

May Week One

- Construct Switchboard to operate database.

May Week Two

- Customize Switchboard.

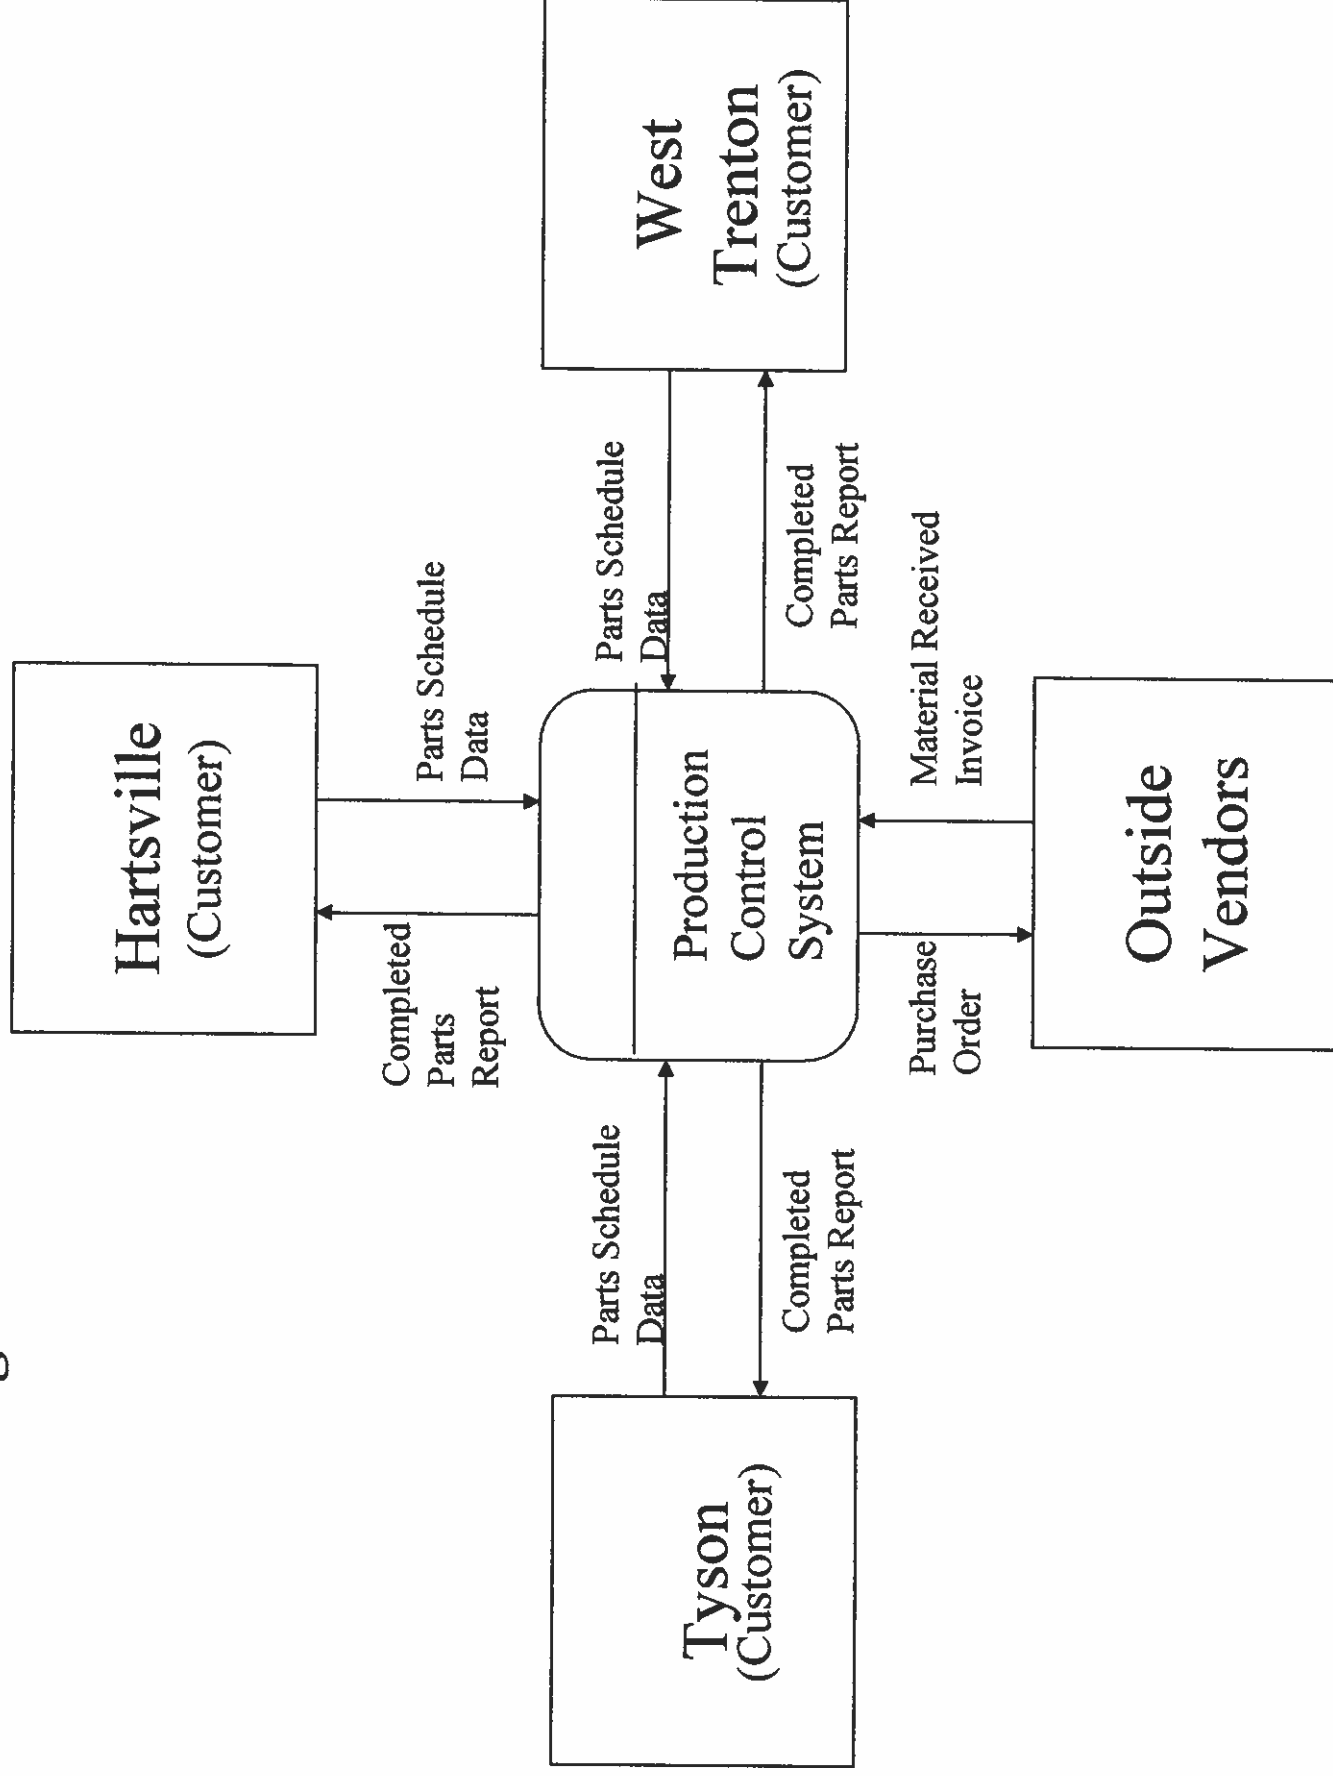

May Week Three

- Produce a schema for the database.

May Week Four

- Begin development of a Powerpoint Presentation .

Entity / Attribute List

Part Schedule

<i>Part Number</i>	Text	Field Size (10)
Item Description	Text	Field Size (26)

Material Inventory

<i>Material</i>	Text	Field Size (9)
Quantity Received	Text	Field size (5)
Quantity Issued	Text	Field size (5)

Monthly Schedule

<i>Part Number</i>	Text	Field Size (10)
Quantity	Text	Field size(4)
Month_Id	Number	Long Integer

Weekly Schedule

Week Number	Text	Field Size (1)
<i>Part Number</i>	Text	Field Size (10)
Quantity of Parts	Text	Field Size (5)
Quantity of Material	Text	Field size (5)

MaterialSchedule

<i>Material</i>	Text	Field size (9)
<i>Part Number</i>	Text	Field size (10)
Quantity of Material	Text	Field size (5)

Month

Month	Text	Field size(10)
ID	AutoNumber	Long Integer

Part Id

<i>Part Number</i>	Text	Field size (10)
Item Description	Text	Field size (26)
Material	Text	Field size (9)
Steel_Id_ID	Number	Long Integer

Steel Id

SteelType	Text	Field size (25)
ID	AutoNumber	Long Integer

* Primary keys are in Italics.

Entity / Attribute List

Purchase Order Form

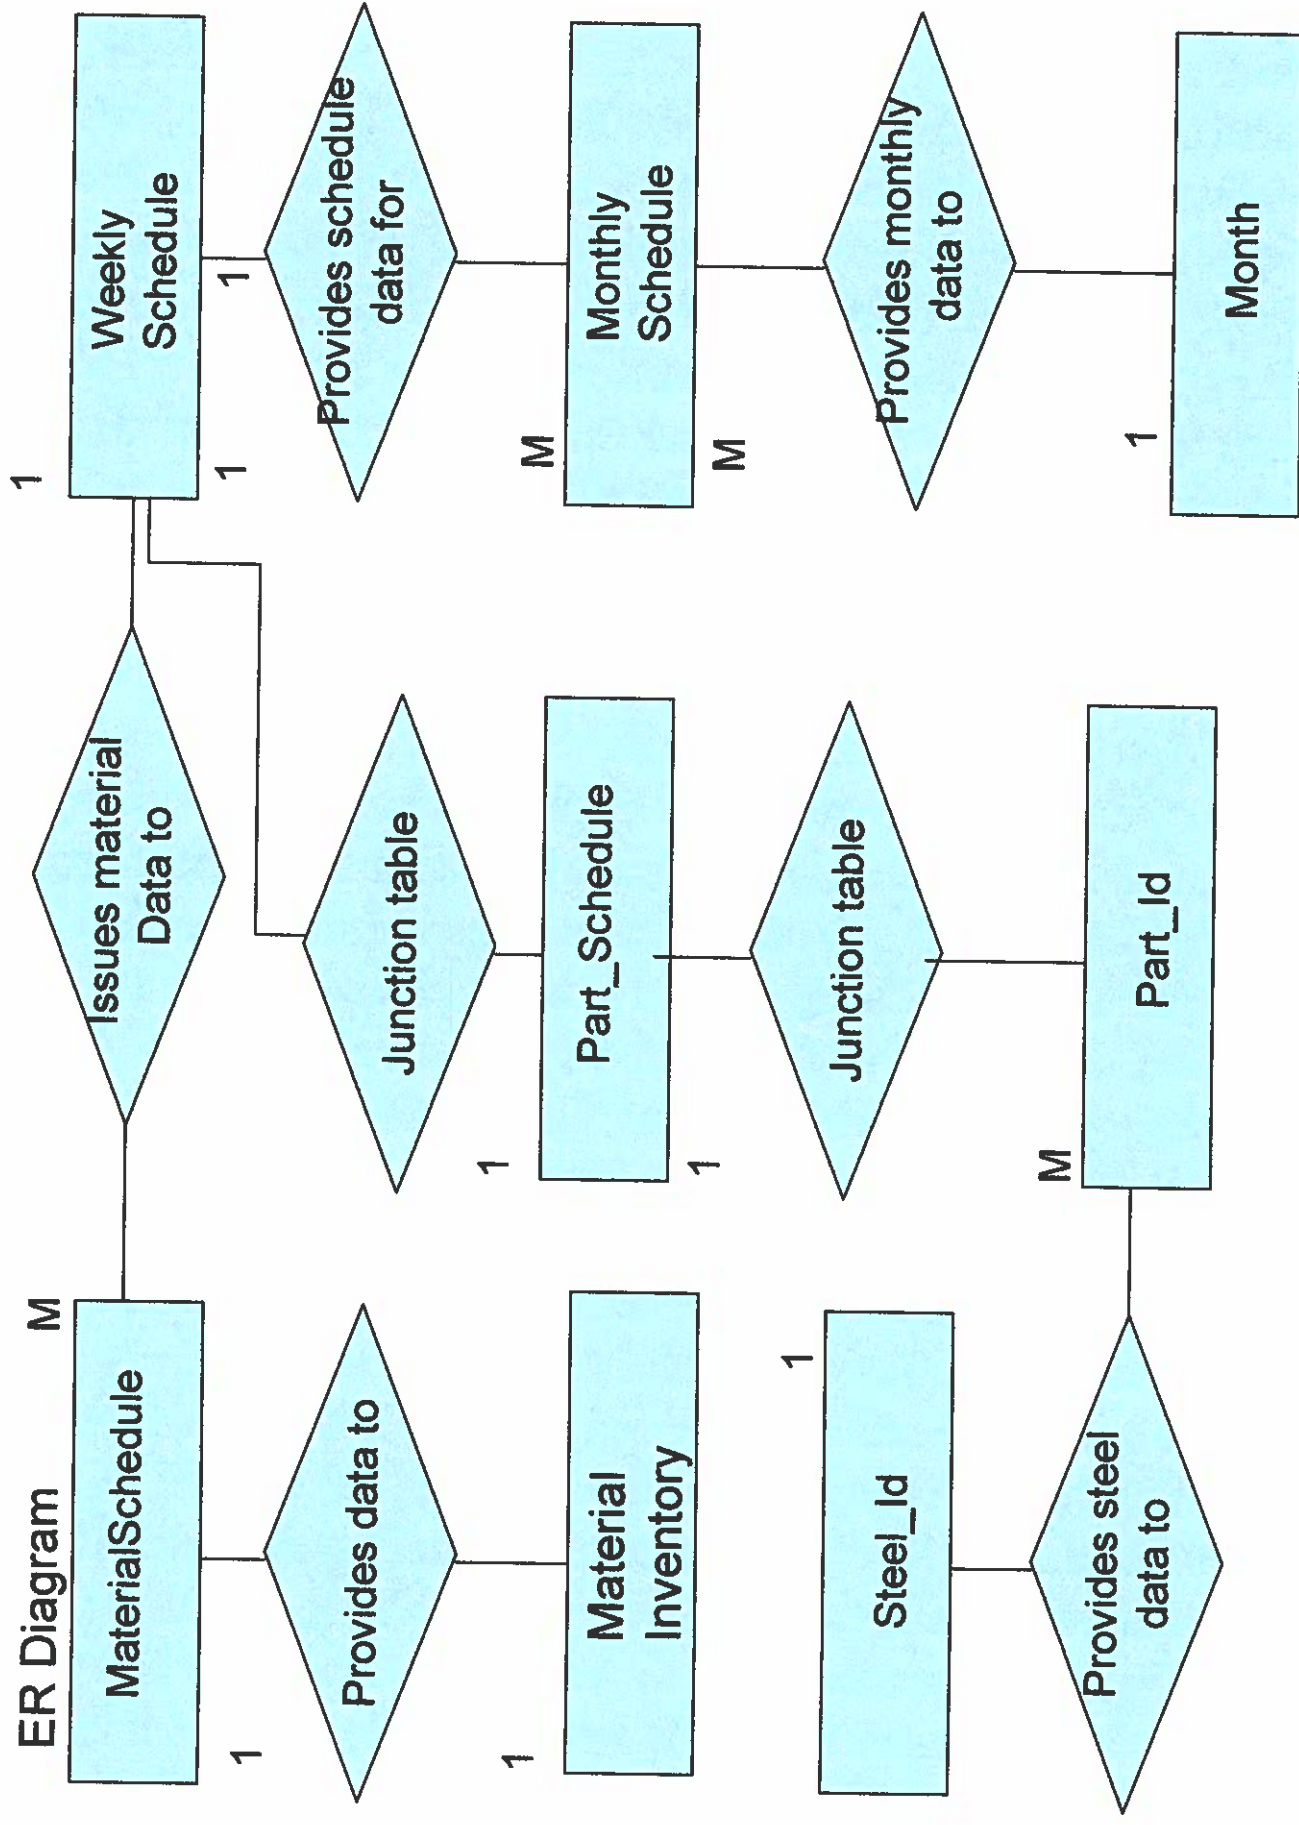

Purchase Order Number	Text	Field size (20)
Supplier	Text	Field size (20)
Contact	Text	Field size (20)
Order Date	Date/Time	
Part Number	Text	Field size (20)

Switchboard

SwitchboardId	Number	Long Integer
ItemNumber	Number	Integer
ItemText	Text	Field size (255)
Command	Number	Integer
Argument	Text	Field size (255)

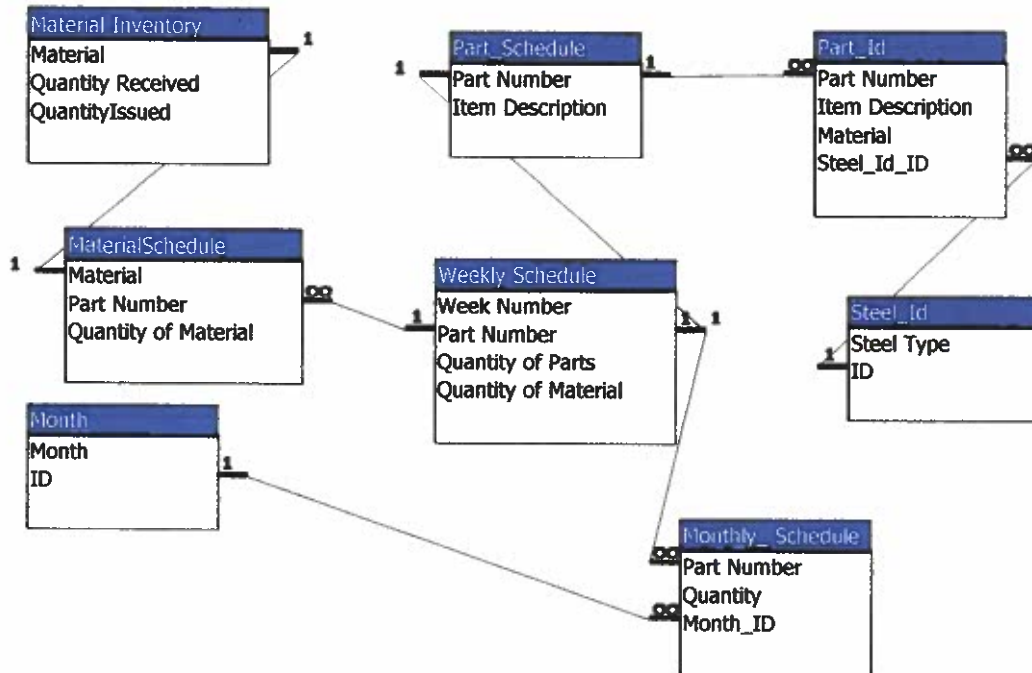

* Primary keys are in Italics.
