

Vendor Management System

By Kristin Lewis

When a Potential Vendor

Capabilities

- Enable Vendor self-service - allow Vendors to enter, update and validate information before SCRA employees review thereby resulting in time savings and data accuracy.
- Automatically inform Vendors when updates are required.
- Perform Vendor certifications and representation validations at the right time for the right Vendors. Automate the validation of vendor information (e.g., company name and tax id -link to Federal tax id site).
- Store Vendor information, communication interactions and notifications that foster improved audit experiences.
- Identify and leverage, the most efficient and effective Vendors to 1) decrease delivery time 2) decrease costs 3) increase quality 4) reduce variation in products and services 5) increase lucrative business development opportunities.
- Provide a method to indicate missing, incorrect information. Capture whether the vendor being added is for a one-time procurement.
- Automatically inactivate Vendors.
- Manage feedback regarding Vendors' products & services.
- In accordance with Federal policy, avoid low cost Vendors where products or services do not meet required standards. (e.g., disbarred, suspended...use EPLS, SAM)
- Foster reporting such as small business reporting through accurate capture of classifications and DUNS. Generate reports by foreign vendor (i.e., company without US based office - no 1099).
- Leverage preferred Vendors (e.g., SC Vendors, Small Business Vendors, Proven Partners, etc.) when Vendor performance and capabilities meet SCRA and Federal requirements.
- Provide visibility of SCRA impacts when preferred Vendors are not leveraged.
- Provide visibility of SCRA benefits when preferred Vendors are leveraged.
- Automate the zip + 4 lookup so that employees no longer must perform. This also facilitates meeting the SCRA CEO request to report by district through the zip + 4 capability.

Relevant Goals

- Replace Outlook Vendor Request Form (decrease data entry error rate and duplicative data).
- Replace the Small Business Vendor (Access) Database.
- Replace numerous spreadsheets, databases that capture Vendor ratings.
- Ensure Vendor data (e.g., business classifications) is current, accurate. (Keep vendor data current so that SCRA risk is reduced.)
- Ensure Contracts vendors and Procurement vendors are properly distinguished in order to ?????
- Decrease the vendor data entry performed by SCRA.
- Reduce manual and redundant entry of Vendor data.
- Increase accuracy of data entered.

- Improve management of FAR clause changes.
- Store relevant Vendor documents in one place.
- Foster the SCRA directive to leverage Fastpay capability (less than 30 days) for preferred small businesses.
- Ensure active credit card vendors are not archived.
- Capture the type of work businesses perform (e.g., NAICS code, capabilities).
- Provide personnel adequate lead time to leverage preferred Vendors (i.e., search capability).
- Expand vendor link in PR system to show all active vendors in the database so that people can choose from list.
- If a vendor is not in database, would like the person that is going to write the PR to contact purchasing before they make a purchase so that the vendor can be set up for service before the PR is in place.
- View the vendor full name.
- Protect sensitive information (i.e., Information Assurance) including social security numbers (SSN) and Electronic Funds Transmission (EFT) information.

Problems, Gaps, Needs

- A Vendor is setup in CostPoint to capture size classification for small bus reporting requirements but are not paid direct, but rather indirectly via credit card. Therefore these vendors may appear to be inactive within CostPoint and are then set to an inactive state requiring certifications to be performed.
- Unable to capture Vendor Paid information per contract for each small business. (Reporting Need) scope?
- Vendors place the wrong information in the W-9 field NAME. (They put their own name instead of the Company Name.)
- W-9 name, TIN doesn't match the IRS validation. (If too many searches in the IRS site, AFG gets locked out of system for up to > 1day.
- Data is entered on the form, but other fields/info is added by AFG and CCP doesn't see this.
- A vendor has been closed in CostPoint when it was being used on other contracts.
- Date on CP vendor record is W9 certification date, not date the info was received from the vendor. Need more than just one date captured. (AFG verify not captured in CP)
- CP system doesn't have all the fields we need, so some data gets entered in the wrong places.
- Differences between Contracts vendors and Procurement vendors.
- Procurement would still do the data entry for their vendors.
- Small Business categories are set up once at beginning, but never updated or asked again (should do it annually for Procurement, but not necessarily for Contracts).
- A vendor could be small business on one contract, but not on others.
- CostPoint Contacts search is painful ...old contacts - no way to see 'date a contact was added'. (AFG)

- Tax ID verification is done manually today.
- In ePR Buyer needs to pick a "vendor address" in order to push the PO into CP, but it isn't obvious which one(s) are for Accts Payable. Gap - who is verifying the data? AFG? CCP? no one?
- Need to identify SC companies (would address work?) in order to say how much business we do with SC companies.
- Once vendor are entered into costpoint and have babies they cannot be deleted. They can only be inactivated.
- Vendor Rating is captured in 2 places: CMS and PDF document. (only done for subcontractors, wish to expand to other vendors.)

Directives

Each division will comply with the intent of the requirements set forth by FAR 52.219-8, Utilization of Small Business Concerns and Small Disadvantaged Business Concerns. [SCRA Small Business Subcontracting Program]

Reuse Opportunities (Known)

- Invoice Processing
- LaunchPad

Interfaces (Known)

- Costpoint
- Contract Management System (CMS)
- (API?) IRS TIN Matching <http://www.irs.gov/Tax-Professionals/e-services---Online-Tools-for-Tax-Professionals>
- (API?) SDN Search <http://sdnsearch.ofac.treas.gov/>
- (API?) Vendor Qualification – EPLS, SAM lists (disbarred from use, suspended). Are there API's to allow us to automatically pull their SAM data for Reps and Certs?

benefits

- Enable Agents/Analysts to easily search for, find, and select vendors.
- Enable Agents/Analysts to register and modify procurement vendors so that SCRA employees and programs have timely access to vendors.
- Enable Agents/Analysts to submit vendor additions, modifications and requests to inactivate to the Accounting Specialist.
- Enable
- Enable Agents/Analysts to easily and quickly certify Vendors.
- Enable Agents/Analysts to identify and leverage the most effective Vendors that meet requirements such as:
 - Accepted vendors (avoid disbarred, suspended vendors)
 - Competitively priced product/service
 - product/service

- Reduce variation in products and services
 - Increase lucrative business development opportunities.
 - Enable Agents/Analysts to inactivate procurement vendors.
 - Enable Accounting Specialists to easily manage Vendor additions and changes to the SCRA Accounting system.
 - Enable Accounting Specialists to receive Vendor information compliant with SCRA Accounting standards.
 - Enable Accounting Specialist to validate requests to update Vendor Information schedule/settings (i.e., Vendor Classifications) in the SCRA Accounting system.
 - Provide Originators with a list of potential Vendors.
 - Make procurements more timely by allowing Originators to select Vendor search criteria:
 - E.g., Service/Goods, State, Affiliation, Preferred (SCRA rating).
 - Provide Vendors with an easy method to add and modify vendor information.
-

From high level reqs draft:

1.1.1 Summary of System Capabilities

1.2 Employee Capabilities

The Vendor Management System (VMS) will provide the following capabilities to employees:

- **Compliance Analysts.** The VMS will enable Compliance Analyst to:
 - Perform Certifications.
 - Generate vendor reports.
 - Update the archive schedule.
- **Purchasing Agents.** The VMS will enable Purchasing Agents to:
 - Search for.
 - Register, modify, evaluate and inactivate vendors.
 - Review and verify vendor information.
 - Take part in:
 - Place, modify, and withdraw bids on items at seller auctions.
 - Respond when vendor expiration notifications occur.
 - Respond when notified of Vendor request.
- **Procurement Analysts.** The VMS will enable Procurement Analysts to:
- **User Support Agents.** The VMS will enable user support agents to:
 - Handle user inquiries.
 - Sanction users who violate the user agreement.
- **Security Officers.** The VMS will
 - Update user restrictions.
 - Notify security officers of security violations.
 - Enable security officers to generate security violation reports.

1.3 Users Capabilities

The VMS will provide the following capabilities to users:

- **Vendors.** The VMS will enable vendors to:
 - Read vendor guidelines.
 - Register, modify, and cancel vendor information.
 - Respond when notified of vendor information requests.
 - Respond when notified of vendor information updates requested.
 - Register responses to vendor information requests.
 - Review their ongoing and recent certifications.
 - Review their account status.
 - Make inquiries regarding accounts.
- **Managers.** The VMS will enable managers to :
-
- **Users.** The VMS will enable all users to:
 - Read general information and user guidelines.
 - Register and maintain a user account:
 - Review and manage their user information (e.g., contact information).
 - Review and manage their account history (e.g., certifications).
 - Review and annotate their individual history.
 - Accept the VMS privacy policy and user agreement.
 - Pay listing and transaction fees by credit card.

1.4 Other Capabilities

- **Authorization Processor Gateway.** The VMS will use the authorization processor gateway to:
 - Request authorization of credit card payments via a dedicated leased telephone line.

VMS Release 1.0 Requirements

Functional Area: Vendor Account Management

Created: October 31, 2014

1. Roles

1.1. Requestor

1.2. Accounting Specialist

1.3. Buyer

1.4. SCRA User

2. Functional Requirements

2.1. Any SCRA user performs the functions:

~~2.1.1. Open a Vendor Record~~

Null box appeared

~~2.1.2. Search for a Vendor Record by:~~

When 'search' button selected, No display of search

1.1.1.1. Vendor Name

1.1.1.2. Vendor ID (Accounting System)

1.1.1.3. TIN

1.1.1.4. Buyer Name

1.1.1.5. Requestor Name

1.1.1.6. Vendor Status

1.1.1.7. Request Status

2.2. The Requestor or Buyer performs the functions:

2.2.1. Create a Vendor Record

2.2.2. Create, Read, Update, Delete Requestor Name

2.2.3. Create, Read, Update, Delete Buyer Name

2.2.4. Search for, Select Name in Requestor Name field

2.2.5. Search for, Select Name in Buyer Name field

2.2.6. Create, Read, Update, Delete Vendor Request Type

2.2.7. Create, Read, Update, Delete Vendor Type (Future VMS, not in scope)

2.2.8. Create, Read, Update, Delete Emergency Request

2.2.9. Create, Read, Update, Delete Reason for Emergency Request (Future VMS, not in scope)

2.2.10. Create, Read, Update, Delete One Time Use

~~Create, Read, Update, Delete Foreign Vendor~~

Not needed; value 'Foreign' is included as a value in the Business Size attribute.

2.2.11. Create, Read, Update, Delete Vendor ID Number (Future: this will become an Accounting System lookup)

This means that the user is keying the Vendor Number, for example if this is a change request.

2.2.12. Create, Read, Update, Delete Name

2.2.13. Create, Read, Update, Delete Business Name

Tammy Note: we could do something cutting edge respective to Name. Provide an enumerated list to identify specific Name attributes such as: Owner, Headquarters, Branch, Legal Name, DBA Name, Disregarded Entity, Trade)

2.2.14. Create, Read, Update, Delete Address

2.2.15. Create, Read, Update, Delete City

2.2.16. Create, Read, Update, Delete State

2.2.17. Create, Read, Update, Delete Zip+4

2.2.18. Create, Read, Update, Delete Country

2.2.19. Create, Read, Update, Delete Phone

2.2.20. Create, Read, Update, Delete Fax

2.2.21. Create, Read, Update, Delete Website Address

2.2.22. Create, Read, Update, Delete Federal Tax Classification

2.2.23. Create, Read, Update, Delete LLC Classification
Create, Read, Update, Delete Exempt Payee Code (Future VMS, not in scope)

- 2.2.24. Create, Read, Update, Delete Exemption from FATCAR Reporting Code
- 2.2.25. Display area/section for Taxpayer Identification Number Information that contains EIN and SSN fields.

The TIN section is not a field.

- 2.2.26. Create, Read, Update, Delete Employer Identification Number (EIN)
- 2.2.27. Create, Read, Update, Delete Social Security Number
- 2.2.28. Create, Read, Update, Delete TIN Applied For (not in scope)
- 2.2.29. Create, Read, Update, Delete Date of TIN Application (Future VMS, not in scope)
- 2.2.30. Create, Read, Update, Delete Vendor Signature Date on Tax Form (Future VMS, not in scope)
- 2.2.31. Create, Read, Update, Delete Terms
- 2.2.32. Create, Read, Update, Delete Business Size
- 2.2.33. Create, Read, Update, Delete Small Business Classification
- 2.2.34. Create, Read, Update, Delete EFT Form Requested
- 2.2.35. Create, Read, Update, Delete W-9 Form Requested
- 2.2.36. Create, Read, Update, Delete Other Forms Requested

~~Create, Read, Update, Delete SAM Registration Status~~

Accounting Specialists do not use SAM/CAGE. Per Deena 20141103.

- 2.2.37. Create, Read, Update, Delete Attachments
- 2.2.38. Create, Read, Update, Delete Notes
- 2.2.39. Create, Read, Update, Delete Requestor Remarks
- 2.2.40. Create, Read, Update, Delete Buyer RemarksDisplay an Accounting Review Section
- 2.2.41. Create, Read, Update, Delete Reviewer Name
- 2.2.42. Create, Read, Update, Delete Date Signed
- 2.2.43. Create, Read, Update, Delete Reviewer Notes
- 2.2.44. Create, Read, Update, Delete Signature
- 2.2.45. Save Request

2.2.46. Save Request and Submit Request

2.2.47. Send a message that includes a link to the Request

2.3. The Accounting Specialist performs the functions:

2.3.1. Create, Read, Update, Delete Vendor Status

2.3.2. 'Improvement Identified' grid: add rows as needed

2.3.3. Create, Read, Update, Delete Improvement Status

2.3.4. Create, Read, Update, Delete Improvement Item

2.3.5. Create, Read, Update, Delete Hold Payments

2.3.6. Create, Read, Update, Delete Note

2.3.7. Create, Read, Update, Delete Signature

2.3.8. Save Request

2.3.9. Send a message that includes a link to the Request

3. Data

3.1. Requestor Name: string

3.2. Buyer Name: string

3.3. Vendor Request Type: drop list

3.4. Vendor Type (Future VMS, not in scope): enumerated list

3.5. Emergency Request: boolean

3.6. Reason for Emergency Request (Future VMS, not in scope): string

3.7. One Time Use: boolean

3.8. Vendor ID Number (Future: this will become an Accounting System lookup): string

3.9. Name: string

3.10. Business Name: string

3.11. Address Name: string

3.12. Address: string

3.13. City: standard

Vendor Management Goals

VMS Definition

The Vendor Management (VMS) system is an application bringing together procurement, contracts, accounting personnel and vendors to set up vendors in a way that is visible across areas of the company, accurately capturing all required data for compliance, and keeping it as simple as possible for SCRA associates and vendors.

What are Vendors?

SCRA Divisions: Vendors assist SCRA Divisions in achieving contractual commitments through the delivery of services and products.

SCRA: Vendors help meet operational needs through delivery of products and services.

Launch: Vendors, i.e., Launch Partners, provide services and products to Launch companies to improve success rates of new companies. A Launch Company can also be a 'Vendor' as defined by CostPoint.

Business Development: Vendors, and potential Vendors, participate in pursuing business opportunities.

Business Goal

The business goal of the Vendor Management (VMS) application is to radically improve the way vendor information is captured and updated increasing accuracy and timeliness, and to increase the use of high-value vendors while ensuring government compliance.

SCRA Strategic Initiatives Relative to Vendor Management

- Foster the improvement and continued viability of small businesses and SC businesses.
- Foster the SCRA directive to leverage Fastpay capability (less than 30 days) for preferred small businesses.

CCP Strategic Initiative Relative to Vendor Management

- Decrease company risks and costs through decreasing the number of Vendors.

Operational Concept

Contract Concept:

A Potential Vendor signs onto the secure VMS site via the Internet and completes and electronically signs the required representation and certification information. Methods to validate information, thereby reducing data errors prior to completing the Vendor Application are provided throughout the Vendor's experience. For example, the Vendor may select a link to the Internal Revenue Service (IRS) website to access Federal Tax Classification codes. The information, now called the Vendor Application, is accessible from VMS. The Contracts Representative receives notification that a Company Package is available. The Contracts Representative. Within the electronic forms

- 3.14. State: standard
- 3.15. Zip+4: standard
- 3.16. Country: standard
- 3.17. Phone: standard
- 3.18. Fax: standard
- 3.19. Website Address: standard
- 3.20. Federal Tax Classification: enumerated list
- 3.21. LLC Classification: enumerated list
- 3.22. Exempt Payee Code (Future VMS, not in scope): string
- 3.23. Exemption from FATCAR Reporting Code (Future VMS, not in scope):: string
- 3.24. Employer Identification Number (EIN): (NN-NNNNNNN)
- 3.25. Social Security Number: (NNN-NN-NNNN)
- 3.26. TIN Applied For (Future VMS, not in scope): standard
- 3.27. Date of TIN Application (Future VMS, not in scope): date
- 3.28. Vendor Signature Date on Tax Form (Future VMS, not in scope): date
- 3.29. Terms: enumerated list
- 3.30. Business Size: enumerated list

This business size is driven by the Small Business Administration CFR 121.105 How does SBA define "business concern or concern"? In the accounting system, Unknown defaults to Large. Foreign also appears in the Application screen. It is important that Business Size populate the business classification field in CP because that is where the info pulls from for CCP's small business report. Only one of these classifications should be selected.

- 3.31. Small Business Classification: enumerated list
- 3.32. EFT Form Requested: boolean
- 3.33. W-9 Form Requested: boolean
- 3.34. Other Forms Requested: boolean
- 3.35. Requestor Remarks: string
- 3.36. Buyer Remarks : string

- 3.37. Save Request: button
- 3.38. Send a message that includes a link to the Request : button
- 3.39. Vendor Status: enumerated list
- 3.40. Improvement Status: enumerated list
- 3.41. Improvement Item: enumerated list
- 3.42. Hold Payments: boolean
- 3.43. Note: string
- 3.44. Reviewer Name: SCRA Accounting Specialist lookup
- 3.45. Date Signed: date
- 3.46. Review Notes: string
- 3.47. Signature: password entry
- 3.48. Save Request: button
- 3.49. Send a message that includes a link to the Request: button

4. Rules

- 4.1. When the record is initially created, based upon user login populate Requestor Name with username.
- 4.2. When the record is initially created, based upon user login populate Buyer Name with username.
- 4.3. Create Signature Date, Time when Signature is created.

NOTES

These RULES may be added post 1.0:

- If Hold Payment' = Yes, the Vendor Status = Inactive
- If Hold payments' = Yes, the Accounting System attribute 'Vendor Status' is set to: Give Warning
- Once the Accounting Specialist completes the review the Vendor Status = Activated

5. Costpoint Interface

- 5.1. In Costpoint, A value of "Unknown" in Business Size defaults to Large.
- 5.2. Non-profit is saved in Costpoint as Size
- 5.3. Foreign is saved in Costpoint as Size.

Vendor Management Application Quality Requirements

This section specifies the required application quality factors that are not related to the specific functional requirements documented in the use case model.

1.1 Accessibility

This subsection specifies the following requirements associated with the degree to which the application must be accessible to people with disabilities:

Any graphical user interfaces of the VMS shall use an adequate font size to be usable by persons with limited visual acuity.

1.2 Auditability

This subsection specifies the following requirements associated with the degree to which the application must support independent auditing of its transactions and finances:

AUD-1) The VMS shall maintain a record for 1 year of each.

AUD-2) The VMS shall maintain a record for 1 year of each.

AUD-3) The VMS shall maintain a record for 1 year of each ??? including:

AUD-4) The VMS shall maintain a record for 1 year of each user inquiry and response.

1.3 Branding

This subsection specifies the following requirements associated with the degree to which the application must support the brand of VMS.

1.4 Configurability

This subsection specifies the following requirements associated with the degree to which the application must exist in multiple simultaneous configurations or variants:

1.4.1 Internationalization

There are no requirements for internationalization envisioned because the initial releases of the VMS will be restricted to users within the United States.

1.4.2 Personalization

The degree of personalization is an open issue that has not been resolved.

1.5 Correctness

This subsection specifies the following requirements concerning the degree to which the application can contain defects and still be acceptable to the customer.

1.5.1 Latent Defects

This subsection specifies the following requirements concerning the maximum number of allowable latent defects in released work products.

COR-1) The maximum number of latent bugs per unit of software shall not exceed TBD for any release.

COR-2) The maximum total number of known latent bugs by category¹ shall not exceed:

Minor = TBD.

Significant = TBD.

¹ Critical defects prevent the use of essential application capabilities and have no work-arounds. Significant defects do have work-arounds. Minor defects are merely inconvenient or annoying to the user.

Critical = TBD.

COR-3) The maximum number of tests that can fail when the application is shipped shall not exceed TBD.

1.5.2 Accuracy

This subsection specifies the following requirements concerning the degree of correctness of the application's outputs:

COR-5) Values of time shall be correct to the nearest second.

1.5.3 Precision

This subsection specifies the following requirements concerning the resolution of the application's numerical outputs:

COR-7) Values of time shall be precise to the nearest second.

1.5.4 Timeliness

This subsection specifies the following requirements concerning the degree to which the application must ensure that its persistent information is current (i.e., up-to-date):

COR-8) When one user updates some data, the application shall ensure that other users shall automatically see the update within 2 seconds.

COR-9) The VMS shall not return requested information to an external that is more than one second obsolete.

COR-10) The application shall automatically transfer "old" information from on-line storage to off-line archives after TBD days.

COR-11) The application shall permanently delete² "obsolete" information from all storage after TBD days.

1.6 Interoperability

This subsection specifies the following requirements associated with the ease with which the application can be integrated with other application (e.g., browsers, legacy applications, and required databases).

The VMS shall interoperate with the following browsers:

IOP-1) Internet Explorer 4.0

IOP-2)

1.7 Maintainability

This subsection specifies the following requirements associated with the ease with which the application can be maintained:

M-3) The Mean Time To Fix (MTTF) shall not exceed one person [day].

1.8 Operational Availability

This subsection specifies the following requirements associated with the percent of time that the application must function correctly.

OA-1) By release 0, the VMS shall provide actors with a minimum operational availability of 99%.

OA-2) By release 1, the VMS shall provide actors with a minimum operational availability of 99.9%.

OA-3) By release 2, the VMS shall provide users a minimum operational of 99.99%.

OA-4) By release 3, the VMS shall provide actors a minimum operational availability of 99.99%.

1.9 Performance

This subsection specifies the following requirements associated with the speed with which the application shall function.

² Note that these requirements should not conflict with any auditability requirements.

1.9.1 Capacity

This subsection specifies the following requirements concerning the minimum number of objects that the application can support:

- PER-1) The application shall support a minimum of [n] simultaneous open ?.
- PER-2) The application shall support a minimum of ? per [time].
- PER-3) The application shall support a minimum of [n] employees.
- PER-4) The application shall support a minimum of [n] users.
- PER-5) The application shall support a minimum of [n] simultaneous interactions.

1.9.2 Latency

This subsection specifies the following requirements concerning the maximum time that is permitted for the application to execute specific tasks (i.e., application operations) or use case paths end to end:

- PER-6) The typical seller shall be able to register a vendor within n minutes.
- PER-7) The typical user shall be able to find vendors within n time.
- PER-8) The typical vendor shall be able to submit information within n time.

1.9.3 Response Time

This subsection specifies the following requirements concerning the maximum time that is permitted for the application to respond to requests:

- PER-9) All application responses shall occur within 30 seconds.

1.10 Portability

This subsection specifies the following requirements associated with the ease with which the application can be moved from one environment (e.g., hardware, operating application) to another.

The VMS shall enable users to use the following environments (e.g., platform and operating application) to interact with the VMS:

User Personal Computer:

- POR-1) PC with minimum of Pentium I chip, 16 meg of RAM, and a 28.8 K modem

Operating Applications:

- POR-2) Windows'95
- POR-3) Windows'98
- POR-4) Windows'NT

1.11 Reliability

This subsection specifies the following requirements associated with the reliability (e.g., mean time between failures, number of failures per unit time) of the application.

- REL-1) The mean time between failures (MTBF) shall exceed 3 months.

1.12 Reusability

This subsection specifies the following requirements associated with the degree to which the application can be used for purposes other than originally intended (e.g., as part of other applications).

- REU-1) The VMS shall incorporate a database continuous availability layer.
- REU-2) The VMS shall reuse common classes such as name, address, telephone number, and currency.
- REU-3) The VMS shall reuse software for sending emails.

1.13 Robustness

This subsection specifies the following requirements associated with the degree to which the application continues to properly function under abnormal circumstances.

ROB-1) The VMS should gracefully handle invalid input (i.e., detect invalid input, request valid input, and not crash) from all externals:

The human actors.

The Processor Gateway.

ROB-2) The VMS should gracefully handle hardware failures (i.e. provide hot failover, notify the application operator, and not crash).

1.14 Safety

This subsection specifies the following requirements associated with the degree to which the application does not directly or indirectly (e.g., via inactivity) cause accidental harm to life or property (e.g., loss of money or data).

SAF-1) The VMS shall not accidentally lose user account information.

SAF-2) The VMS shall accurately calculate notifications and escalations.

SAF-3) The VMS shall not accidentally lose vendor information.

1.15 Scalability

This subsection specifies the following requirements associated with the degree to which the application can scale (e.g., can handle more simultaneous users or clients, can store more information in its databases).

SCA-1) The VMS shall be able to scale as follows:

Release	Open Sales	Sales Per Year	Total Employees	Total Users	Simultaneous Interactions
0	10	N/A	10	10	10
1					
2					
3					

1.16 Security Requirements

This subsection documents the security requirements that specify the extent to which the VMS shall protect itself and its sensitive data and communications from accidental, malicious, or unauthorized access, use, modification, destruction, or disclosure.

1.16.1 Authorization Requirements

This subsection documents the authorization requirements that specify the access and usage privileges of authenticated users and client applications:

The VMS shall restrict the performance of all users to persons who have successfully registered as a user.

1.16.2 Immunity Requirements

This subsection documents the immunity requirements that specify the extent to which the VMS shall protect itself from infection by unauthorized harmful programs (e.g., computer viruses, worms, and Trojan horses):

Scanning – The VMS shall scan all entered or downloaded data and software against the published definitions of known computer viruses, worms, Trojan horses, and other similar harmful programs.

Disinfection – If possible, the VMS shall disinfect any data or software found to contain such a harmful program.

Prevention – The VMS shall delete the infected file if it cannot disinfect the infected data or software.

Current Definitions – The VMS shall daily update its list of published definitions of known harmful programs.

Notification – The VMS shall notify a member of the security team if it detects a harmful program during a scan.

1.16.3 Integrity Requirements

This subsection documents the integrity requirements that specify the extent to which the VMS shall protect its data and communications from intentional corruption via unauthorized creation, modification, or deletion:

Communications – The VMS shall protect a minimum of 99.999% of its communications from unauthorized intentional corruption during transit including communications with the:

Employees:

Users:

Processing Gateway (for Credit Card Authorizations)

1.16.4 Intrusion Detection Requirements

This subsection documents the intrusion-detection requirements that specify the extent to which the VMS shall detect attempted access or modification by unauthorized individuals or programs:

Repeated Authentication Failure – A minimum of 99.99% of the time, the VMS shall notify the security officer within one minute if it cannot successfully verify the identity of any actor in less than four attempts within any one-hour period.

Authorization Failure – A minimum of 99.99% of the time, the VMS shall notify the security officer within one minute if any actor attempts to perform a use case for which it is unauthorized.

1.16.5 Privacy Requirements

The privacy goal of the VMS is to ensure the confidentiality of all information entrusted to it, whether stored or communicated, except for such information that an operational requirement explicitly makes public.

The following privacy requirements specify the extent to which the VMS shall support anonymity and keep its confidential data and communications private from unauthorized individuals and programs.

User Privacy – A minimum of 99.999% of the time, the VMS shall restrict access as indicated to the following confidential user information, whether communicated or stored:

Credit Card Information (restricted to the user, accountants, and user support agents):

- The credit card number (employees may only see the last 4 digits)
- The credit card expiration date
- The name on the credit card

Password Information (restricted to the user and user support agents):

- Password
- Password Confirmation

Postal Address (restricted to the user and user support agents):

- Street Address
- City
- State
- Zip Code

Telephone Number (restricted to the user and user support agents)

1.17 Usability

This subsection specifies the following requirements associated with the ease with which the application can be used.

The application shall enable at least 90% of a statistically valid sample of representative novice users to:

- Register as a seller within 10 minutes.
- Register an auction within 5 minutes.
- Place a bid on a given item within one minute.
- Provide feedback on a seller within 3 minutes.

The application shall enable at least 90% of a statistically valid sample of representative experienced users to:

- Register as a seller within 5 minutes.
- Register an auction within 2.5 minutes.
- Place a bid on a given item within 30 seconds.
- Provide feedback on a seller within 2 minutes.

USE-5) The average seller shall be able to learn to register a sale within 5 minutes.

USE-6) The average Purchasing Agent shall be able to learn to find relevant items within 3 minutes.

USE-7) The average Purchasing Agent shall be able to learn to place a bid or offer within 3 minutes.

USE-8) The typical user shall be able to freely, easily, and quickly navigate between relevant webpages.

2 Application Constraints

The section documents the major architecture, design, and implementation constraints on the application.

2.1 Business Rules

The subsection documents all required data design constraints.

2.2 Data and Content Constraints

The subsection documents all required data constraints.

2.2.1 Databases

The subsection documents all required design constraints regarding the use of databases.

None

2.3 Hardware Constraints

The subsection documents all required constraints associated with minimum or actual hardware.

None

2.4 Software Constraints

The subsection documents all required software constraints.

2.4.1 High-Level Languages

The subsection documents all required design constraints associated with the use of high-level programming languages.

SYSDC-HLL-1) Application server software shall be written in Java.

SYSDC-HLL-2) Employee client software shall be written in Java.

SYSDC-HLL-3) User client software shall be written in DHTML, CSS, and JavaScript webpages.

SYSDC-HLL-4) Where practical, data shall be defined and documented using XML.

2.5 Industry Standards

The subsection documents all required design constraints associated with industry standards.

DC-STD-1) The application shall conform to ISO 10646 (Unicode UTF-8) and ISO 10646-1 (Unicode UTF-16) standards for character set encoding.

www.unicode.org

ftp.informatik.uni-erlangen.de/pub/doc/ISO/charsets/ISO-10646-UTF-8.html

ftp.informatik.uni-erlangen.de/pub/doc/ISO/charsets/ISO-10646-UTF-16.html

DC-STD-2) The application shall conform to ISO 4217, codes for the representation of currencies.

www.xe.net/gen/iso4217.htm

DC-STD-3) The application shall conform to ISO 31, codes for units of measure.

www.unecce.org/trade/rec/rec20en.htm

DC-STD-4) The application shall conform to ISO639-1 Languages, codes for the representation of languages.

http://sunsite.berkeley.edu/amher/iso_639.html

DC-STD-5) The application shall conform to ISO 3166-1, codes for the representation of names of countries.

www.din.de/gremien/nas/nabd/iso3166ma/codlstpl/index.html

DC-STD-6) The application shall conform to ISO 8601, representation of dates and times.

www.state.ak.us/local/akpages/ADMIN/info/iso8601.htm

2.6 Legal and Regulatory Constraints

The subsection documents all required design constraints associated with legal and regulatory constraints.

None

Design Vendor Account Management – VMS Release 1.0

Contents

SECTION 1: VENDOR SEARCH (not in scope/current form, though may be needed)	1
SECTION 2: VENDOR REQUEST INFORMATION	1
SECTION 3: TAX FORM INFORMATION	2
SECTION 4: ACCOUNTING SECTION	2
Rules	3
Notes.....	3

Description

This Accounting screen is leveraged by the Buyer and Contracts Representative to add information about a Vendor. The Accounting Specialist reviews information and enters the data in the Accounting System to establish the Vendor payment account.

When the Vendor information is verified by the Accounting Specialist, Buyers access the information to review the 'Improvement Identified' section in order to resolve data issues. When the Accounting Specialist 'completes' the review that signifies that the Vendor is Activated in the Accounting system.

Users

Accounting Specialist, Buyers, Requestors

SECTION 1: VENDOR SEARCH (not in scope/current form, though may be needed)

Vendor Name	Vendor ID
TIN	Buyer Name
Requestor Name

Notes

Tab: Attachments is needed

Reps and Certs [Form Addition]

(This information needs to be appended to the existing Reps and Certs form)

Created: July 18, 2014

Add the below in

Section 1. Company Information below 'Company Name' (the box doesn't need to exist:

☐ A Division of,

☐ A Subsidiary of,

☐ An Affiliate of

Parent Company Name:

Parent TIN:

Add the below IN PLACE of the EXISTING codes:

Section 3. Company Identification Codes/ Change the Title to:

Section 3. Small Business Classification and Codes

Business Size

Select One

☐ Small Business

☐ Large Business

☐ Non-Profit Business

☐ Foreign Business (non-U.S.)

If assistance is needed in determining size, please refer to SBA's website at www.sba.gov/size or contact your local SBA office.

Small Business Classification

Select All that Apply

☐ Minority Business Enterprise

☐ SBA 8(a) Small/Disadvantaged Business Program

☐ SBA 8(a) American Indians, Native Alaskans and Native Hawaiians

☐ Small Business - (Established by North American Industry Classification (NAICS) Code for all categories of government business)

☐ SBA HubZone - Historically Underutilized Business Zone (*Click to Attach SBA Certification Letter*)

☐ Service-Disabled Veteran-Owned Small Business

☐ Veteran-Owned Business

☐ Woman-Owned Business

☐ Historically Black College or University and Minority Institution

☐ Does not apply

Definitions for the above categories are available in the Federal Acquisition Regulation 19.7 or 52.219-8 www.acquisition.gov/far.

Number Of Employees _____

The number of employees should include the total of all employees located in all divisions, affiliates, subsidiaries, and the parent company.

or

Gross Annual Receipts _____
Month/Year Business Established (MM/YYYY)

Company Identification Codes

DUNS # (8-digit) (Click to Associate an Address, if Different Above Address) **Rule about TIN and DUNS?**
If the Offeror does not have a Data Universal Numbering System (DUNS) number, contact Dun and Bradstreet Directly to Obtain one (FAR 52 204-6 (APR 2008).

Listed in CCR? Yes/No/Unknown **If Yes, Enter: CAGE Code (5-digit)**

NAICS Subsector Primary [Click to Select] **NAICS Primary Code** [Click to Select One]

NAICS Subsector Additional [Click to Select] **NAICS Additional Code** [Click to Select One]

To access the System for Award Management, click here [SAM](#).

To look up the NAICS code for the product or service that you are selling, click here: [NAICS](#).

NAICS codes are needed for the SF 295 SDB breakout report (by 3y-3-digit NAICS subsector) that the prime contractor is required to submit to the Government annually pursuant to the Federal Acquisition Regulation (FAR) clause at 52.219-9(j)(2).

Small Business Eligibility Statement

Eligibility as a small business is based upon the regulations issued by the Small Business Administration per 13 CFR 121 of the SBA Rules and Regulations. (If in doubt of business size, consult the Small Business Administration Office in your area.) Eligibility as a small disadvantaged business is first based on eligibility as a small business, as noted above. Second, disadvantaged status consists of at least 51 percent ownership of a firm by a disadvantaged person(s) and daily management and control of the firm by such disadvantaged person(s). Disadvantaged person(s) are minority groups, specifically African Americans, Hispanic Americans, Native Americans (Aleuts, Eskimos, American Indians and Hawaiians). Asian-Pacific Americans and firms which have been admitted to the SBA's 8(a) Program.

Any person who misrepresents a firm's status as a small business in order to obtain a contract to be awarded under the preference programs established pursuant to sections 8(a), 8(d), 9, or 15 of the Small Business Act or any other provision of Federal law that specifically references section 8(d) for a definition of program eligibility shall be punished by fines, imprisonment, or both; be subject to remedies such as suspension or debarment; and be ineligible for participation in programs conducted under the authority of the Act. {Ref: FAR52.219-1}

Exempt organization under IRC Section 501 or IRC Section 115

Foreign corporation or business entity exempt from tax withholding because income is effectively connected with the conduct of a trade or business in the U.S.

Foreign corporation or business entity not exempt from tax withholding.

Country of incorporation or registration:

Foreign corporation, business entity or exempt organization being compensated for services performed outside of the U.S.

Reviewer Assigned		Date Assigned	[DATE TIME]
Review Status Complete	Acknowledge Rcpt	Date Started	[DATE TIME]
Signature Signed by [Name] on [DATE TIME]		Date Completed	[DATE TIME]
Reviewer Notes			

Rules

1. If 8(a) or HUBZone Status is selected by the Vendor (V1.0 Buyer), the 8a Expiration Date is required.
2. When a SAVE is attempted, if a Repts & Certs Disclosure Statement 'Appropriate Box' is required and not selected, flag the user.
3. When a SAVE is attempted, if a Repts & Certs Disclosure Statement 'Date' is required and is null, flag the user.
4. When a SAVE is attempted, if a Repts & Certs Disclosure Statement 'Name and Address of Cognizant ACO or Federal Official Where Filed' is required and is null, flag the user.
5. If Tax Information is entered first (e.g., W-9, W-8), populate address information with the Tax Information Address.
6. If Business Size = Small, display SMALL BUS CLASSIFICATION section.
7. If Business Size = Foreign Business, a Form W-8 is *required*.
8. NAICS Subsector Additional= 0 or Many
9. If a saved Attachment with an Attachment Type = **SBA Certification Letter** then "Business Certifications Attached" Checkbox = Yes

10. If Vendor has not completed SAM or if SAM record = expired, all sections of “SCRA Contracting Representations and Certifications” form are completed.
11. If Vendor SAM record = unexpired (i.e., ‘Expiration Date’ = less than current date), the Vendor only completes “SCRA Contracting Representations and Certifications” sections 1-10 and 29 Attestation.

Roles

12. Buyer performs SAM verification.
13. Buyer performs Buyer Review.
14. Small Business Liaison performs Business Certification Verification.
15. Small Business Liaison performs Business Size Verification.
16. Small Business Liaison performs Small Business Classification Verification.

Requirements

17. Provide a SAM URL link directly from VMS.
18. Allow prepopulated address information (pulled from Tax Form) to be edited by authorized users.
19. Allow the user to save a copy of the completed form.
20. Allow the user to print a copy of the form.
21. Allow the user to print a copy of the completed form.
22. Print the form version number.
23. Allow the SCRA user to HIDE the Eligibility Statement section.
24. ‘Improvement Status’ is a shared drop list with Accounting design.
25. Section ‘SCRA Verification Section’ also exists in the Business Self Certification form design; though is organized slightly differently. The attributes across the Reps and Certs and the Business Self Certification should be synchronized. The only exception is SAM data is not applicable when using the Business Self Certification form.
